

Set a Display as Main Display in Settings

1 Do [step 2](#) or [step 3](#) below for how you would like to open Display settings.

2 Right click or press and hold on your desktop, click/tap on **Display settings**, and go to [step 4](#) below. (see screenshot below)

3 Open [Settings](#), click/tap on the **System** icon, and go to [step 4](#) below.

4 On the right side of **Display**, click/tap on the **display number** at the top that you want to make the main display, and check the **Make this my main display** box under **Multiple displays**. (see screenshot below)

You can click/tap on the **Identity** button to briefly display numbers on your display(s) to help see which display belongs with each number.

If **Make this my main display** is grayed out, then it means that the currently selected display is already set as the main display.

Make this my main display

The image shows the Windows Settings application window with the 'Display' settings page open. The left sidebar contains a list of system settings: Home, Find a setting, System, Display, Notifications & actions, Power & sleep, Battery, Storage, Tablet mode, Multitasking, Projecting to this PC, Shared experiences, and About. The main content area is titled 'Display' and includes the following sections:

- Select and rearrange displays:** A visual representation of three displays labeled 1, 3, and 2. Display 1 is highlighted in blue. A yellow callout bubble with the text '1. Click on' points to the 'Display' option in the left sidebar. Another yellow callout bubble with the text '2. Select' points to the display labeled '1' in the visual representation. Below the visual representation are 'Identify' and 'Detect' buttons.
- Color:** Includes a 'Night light' toggle switch set to 'Off' and a link to 'Night light settings'.
- Scale and layout:** Includes a dropdown menu for '100% (Recommended)', a link to 'Custom scaling', a dropdown menu for 'Resolution' set to '1920 x 1080 (Recommended)', and a dropdown menu for 'Orientation' set to 'Landscape'.
- Multiple displays:** Includes a dropdown menu for 'Multiple displays' set to 'Extend desktop to this display', and a checkbox for 'Make this my main display' which is unchecked. A yellow callout bubble with the text '3. Check' points to this checkbox. Below this is a link to 'Display adapter properties'.
- Have a question?:** Includes a link to 'Get help'.
- Make Windows better.:** Includes a link to 'Give us feedback'.

5 When finished, close Settings.
