## **Credit and Qualifications Framework for Wales**

**Learning and Progression Routes** 

The Credit and Qualifications Framework for Wales was introduced in 2003 as a fully inclusive learning framework. The Levels capture all learning from the very initial stages (Entry) to the most advanced (Level 8). The Fan diagram illustrates the levels and examples of qualifications and learning provision that are included in it.

Level 4	Achievement at Level 4 reflects the ability to identify and use relevant understanding, methods and skills to address problems that are well-defined but complex and non-routine. It includes taking responsibility for overall courses of action as well as exercising autonomy and judgement within broad parameters. It also reflects understanding of different perspectives or approaches within an area of study or work.	Use practical, theoretical or technical understanding to address problems that are well-defined but complex and non-routine.  Analyse, interpret and evaluate relevant information and ideas.  Be aware of the nature and approximate scope of the area of study or work.  Have an informed awareness of different perspectives or approaches within the area of study or work.	Address problems that are complex and non-routine while normally fairly well-defined.  Identify, adapt and use appropriate methods and skills.  Initiate and use appropriate investigation to inform actions.  Review the effectiveness and appropriateness of methods, actions and results.	Take responsibility for courses of action, including where relevant responsibility for the work of others.  Exercise autonomy and judgement within broad but generally well-defined parameters.

Level 6	Achievement at Level 6 reflects the ability to refine and use relevant understanding, methods and skills to address complex problems that have limited definition. It includes taking responsibility for planning and developing courses of action that are able to underpin substantial change or development, as well as exercising broad autonomy and judgement. It also reflects an understanding of different perspectives, approaches or schools of thought and the theories that underpin them.	Refine and use practical, conceptual or technological understanding to create ways forward in contexts where there are many interacting factors.  Critically analyse, interpret and evaluate complex information, concepts and ideas.  Understand the context in which the area of study or work is located.  Be aware of current developments in the area of study or work.  Understand different perspectives, approaches or schools of thought and the theories that underpin them.	Address problems that have limited definition and involve many interacting factors.  Determine, refine, adapt and use appropriate methods and skills.  Use and where appropriate design relevant research and development to inform actions.  Evaluate actions, methods and results and their implications.	Take responsibility for planning and developing courses of action that are capable of underpinning substantial changes or developments.  Initiate and lead tasks and processes, taking responsibility, where relevant, for the work and roles of others.  Exercise broad autonomy and judgement.

Level	Summary	Knowledge and Understanding	Application and action	Autonomy and accountability
Level 7	Achievement at Level 7 reflects the ability to reformulate and use relevant understanding, methodologies and approaches to address problematic situations that involve many interacting factors. It includes taking responsibility for planning and developing courses of action that initiate or underpin substantial change or development, as well as exercising broad autonomy and judgement. It also reflects an understanding of relevant theoretical and methodological perspectives and how they affect their area of study or work.	Reformulate and use practical, conceptual or technological understanding to create ways forward in contexts where there are many interacting factors.  Critically analyse, interpret and evaluate complex information, concepts and theories to produce modified conceptions.  Understand the wider contexts in which the area of study or work is located.  Understand current developments in the area of study or work.  Understand different theoretical and methodological perspectives and how they affect the area of study or work.	Conceptualise and address problematic situations that involve many interacting factors.  Determine and use appropriate methodologies and approaches.  Design and undertake research, development or strategic activities to inform the area of work or study or produce organisational or professional change.  Critically evaluate actions, methods and results and their short and long term implications.	Take responsibility for planning and developing courses of action that initiate or underpin substantial changes or developments.  Exercise broad autonomy and judgement across a significant area of work or study.  Initiate and lead complex tasks and processes, taking responsibility, where relevant, for the work and roles of others.
