Closer than you think.

With the benefit of a great train service and the amazing, coastal A55 dual carriageway, getting to Bangor couldn't be easier or more enjoyable.

As well as spectacular views of the sea, your journey here will take you past world famous Gwrych Castle (home of the last two series of I'm A Celebrity Get Me Out Of Here) and the dramatic mountain-scape of Snowdonia.
Thank you for your interest in our wonderful university. I’m sure you’re excited to be considering studying for a degree and choosing the right university is the first step.

Bangor is a special place and a community where you’ll be supported to explore and develop your talents and plan your future career.

At Bangor, students are at the heart of all that we do and we’ve invested in developing academic, sports and social facilities that make it an even more friendly and attractive place to study and live.

Bangor has outstanding academic and teaching credentials and is underpinned by world-leading, internationally excellent, research that I am sure you will find fascinating. Almost all of our research academics teach, ensuring you will benefit directly from the knowledge created by our research.

Being a part of our Bangor University community will also enable you to gain valuable work experience and look beyond your course to engage with a wide range of extra-curricular and volunteering opportunities.

Many of our students tell us that giving back to society through volunteering gives them extra meaning to their experience here.

All this takes place close to a World Heritage Site and Area of Outstanding Natural Beauty, contributing to a unique experience here in Bangor.

I hope you’ll come and create your future here with us.

Professor Iwan Davies
President and Vice-Chancellor
JAMES AVISON
PRESIDENT, STUDENTS’ UNION
Welcome from the Students’ Union.

We are very proud of student life here at Bangor University and believe that we offer a unique and special experience to all students, the like of which can’t be found elsewhere in the UK.

We are Undeb Bangor, the home of all things student. ‘Undeb’ means Union in Welsh, and we call ourselves Undeb Bangor as we are very proud of our bilingual environment, and where we are situated in the world (in the most beautiful part of Wales, right next to Snowdonia National Park!).

We are your Students’ Union and we are here for all Bangor University students, led by elected student leaders who are passionate about enriching and enhancing your experience whilst studying here.

We are proud of the fact that we are the only public university in the UK offering free clubs and societies for all students, meaning the opportunity to get involved, discover or experience new activities, volunteering opportunities, sports and hobbies is like nowhere else.

A key reason we are here is to make sure your voice is heard. We are constantly working to make your experience even better by championing new student-led projects and activities, and collaborating with the University to enhance your academic experience to benefit you and your fellow peers.

We look forward to welcoming you to our community and helping you to find a new hobby, meet like-minded friends, and have the most enjoyable experience possible here at University.

Croeso - welcome to Bangor!

James Avison
President
Students’ Union

2nd in the UK for Societies and Sports.
(WhatUni? Student Choice Awards, 2020)
Welcome from UMCB.

Bangor's Welsh Students' Union

UMCB represents Bangor’s Welsh-speaking students academically and socially.

UMCB is led by the UMCB President who is part of the full-time Sabbatical Officers’ team in Undeb Bangor, Bangor’s Student Union. UMCB has an Executive Committee that also coordinates and assists with organising events, making decisions and reporting any problems that students have. The Committee is made up of 14 members, all of whom are elected to the Committee by the students themselves.

Any student who can speak Welsh, to any standard, is automatically a member of UMCB. We hold various events and offer various societies and clubs that all run through the medium of Welsh.

We have societies such as our ‘Aelwyd JMJ’ choir, our ‘Chwaraeon y Cymric’ sports clubs which have rugby and football teams for men and women as well as women’s hockey and netball teams. The John Gwilym Jones Society is our poetry, literature and drama society, Y Llef is our digital platform, Radio UMCB is our radio station and the ‘Ffrind Cymraeg’ (Welsh Friend) project is an opportunity to meet Welsh learners in an informal atmosphere.

We also organise an annual rugby trip to Dublin or Edinburgh and attend the Inter-Collegiate Dance and Eisteddfod every year.

We will be delighted to welcome you into our community at Bangor and we look forward to meeting you.

Mabon Dafydd
President, UMCB

75% of the University’s workforce are Welsh speaking.

1/4 of our students have Welsh language skills.
Since 1884.

Facts and figures.

Bangor University was founded in 1884, funded in-part by quarrymen and farmers who wanted to give the local people of North Wales the chance to access higher education - making it one of the oldest and most prestigious degree-awarding institutions in the UK.

The University is situated in an unrivalled location between the mountains and the sea. You’ll be studying on the doorstep of the dramatic Slate Landscape of North West Wales which, in 2021, became a UNESCO World Heritage site, joining the likes of the Taj Mahal, the Grand Canyon National Park and Machu Picchu.

The University’s connection with the slate industry is an important part of its history, due to the vision and determination of the quarrymen, their families and communities. Quarrymen contributed fixed sums out of their earnings to raise the funds to establish a university in North Wales.

Around 10,000 students currently study at the University, and Bangor offers something for everyone, known for academic excellence, world-leading research and a welcoming community against the stunning background of Snowdonia National Park.
Why choose Bangor?

• Top 10 in the UK for Student Satisfaction (Complete University Guide 2021)

• Top 20 in the UK for Course Satisfaction (Guardian University League Table 2021)

• More than three-quarters of Bangor’s research is either world-leading or internationally excellent (REF 2014)

• Best in the UK based on Student Crowd reviews (StudentCrowd Reviews 2020)

• Top 15 in the UK for Teaching Quality (The Times and Sunday Times Good University Guide 2020)

• 15th in the world for Sustainability, UI GreenMetric (World University Rankings, 2021)

• 2nd in the UK for Societies and Sports (WhatUni? Student Choice Awards, 2020)

• Top 25 UK University for Job Prospects (WhatUni? 2020 Awards)

• Ranked No. 1 most affordable university town (Totally Money, 2019)

• 92% of our graduates progressed to employment or further study within 15 months of graduation (Graduate Outcomes Survey, 2018/19 graduating cohort)
Fact 1: About the city of Bangor

Bangor is the oldest city in Wales and one of the smallest cities in the UK. The city is situated in Gwynedd in North Wales, near the beautiful waters of the Menai Strait. 'Bangor' itself is an old Welsh word for a wattled enclosure, such as the one that originally surrounded the cathedral site.

Fact 2: About Snowdon

Yr Wyddfa (Snowdon) is the highest mountain in Wales and the highest point in the British Isles outside the Scottish Highlands, at 1,085 metres above sea level. If you don’t fancy the climb, you can even ride the Snowdon Mountain Railway!
Fact 3: About Garth Pier

Bangor’s Garth Pier celebrated its 125th anniversary in 2021. At 460m in length, it is the second-longest pier in Wales. Enjoy the breath-taking scenery or buy food or gifts from one of the many pretty Victorian kiosks.

Fact 4: About castles

Wales is often called ‘the land of castles’ – there are 427 of them! Wales has more castles per square mile than any other country in Europe. Caernarfon Castle, Beaumaris Castle, Dolbadarn Castle and Conwy Castle are all within a half-hour drive from Bangor!
Fact 5:
About Prichard-Jones Hall

On 23 August 1939, a week before the Second World War began, the National Gallery in London began to evacuate its most precious paintings to Bangor, to escape the expected aerial bombing. More than 500 paintings, including works by Botticelli, Rubens and Rembrandt, were stored at the University's PJ Hall.
Fact 7: About UNESCO World Heritage site

The slate landscape of north-west Wales area was awarded the coveted World Heritage status by UNESCO (The United Nations Educational, Scientific and Cultural Organization) in July 2021, after a lengthy campaign.

Fact 8: About ZipWorld

Are you a thrill-seeker? The world’s fastest and Europe’s longest zip line, Velocity 2 at Zip World, is just 7 miles from Bangor, featuring four parallel lines that span 1.5 kilometres over the beautiful blue water of Penrhyn Quarry lake.

Fact 6: About St Deiniol’s Cathedral

St Deiniol’s Cathedral, which stands in the centre of the city, is the oldest cathedral foundation in Britain, and was founded around 525 AD. Many of the native princes of Wales are buried at the site.
Recognising excellence.
Sir David Attenborough, OM, CH, CVO, CBE, FRS

Sir David is one of only four individuals to be awarded an Honorary Degree, to mark the University’s 125th anniversary. He was awarded the Honorary Degree for services to broadcasting and the study of the environment.

Sir David’s father studied at Coleg Normal in Bangor, and the family spent many family holidays in the area.

Of his award, he said:

"I'm delighted and truly honoured to receive the Honorary Degree. I spent many happy holidays on the island (of Anglesey) studying birds and the marvellous fossils on the beach at Penmon.

"I'm thrilled too, because this University has a superb reputation in the study of environmental and marine science. The world needs people skilled in the expertise and research needed to play a crucial part in solving the world's problems. There is no kind of honour I value more highly than that bestowed by a university."

Our Honorary Fellowships & Degrees are highly prestigious awards which we bestow upon distinguished individuals who have a connection with the University, or with Wales, and who have made an outstanding contribution to their chosen field.

George North

Wales & British & Irish Lions rugby player, George North, was brought up on Anglesey and attended Ysgol Bodedern. Aged 18 years and 214 days, North became the youngest player to score a try in his debut for Wales. He was awarded an Honorary Fellowship for services to sport in 2014.

Of his award, he said:

"I'm delighted and truly honoured to receive the Honorary Fellowship. I spent many happy holidays on the island (of Anglesey) studying birds and the marvellous fossils on the beach at Penmon.

"I'm thrilled too, because this University has a superb reputation in the study of environmental and marine science. The world needs people skilled in the expertise and research needed to play a crucial part in solving the world's problems. There is no kind of honour I value more highly than that bestowed by a university."
Huw Stephens

Huw Stephens is a Welsh radio and TV presenter, broadcasting on BBC Radio Cymru and BBC Radio 6 Music. Huw joined BBC Radio 1 at 17, becoming the youngest ever Radio 1 DJ. He received an Honorary Fellowship for services to music in 2015.

Dr Ruth Hussey CB OBE

Dr Ruth Hussey was previously Chief Medical Officer and Medical Director at NHS Wales and was awarded an Honorary Fellowship for her services to medical sciences in 2016.
Prof Dr Karin Lochte is an alumna renowned for her commitment to international marine science and specifically her leadership roles at the Alfred Wegener Institute and her membership on the NERC Council. She was awarded an Honorary Fellowship for her services to marine biology in 2019.
Danny Boyle - Oscar-winning director

Danny Boyle graduated from Bangor University in 1978 with a degree in English and Drama. His most successful project to date has been 'Slumdog Millionaire' in 2008, which won eight Oscars including Best Director. Other movies directed by Danny Boyle include 'Trainspotting', '127 Hours', 'The Beach', 'A Life Less Ordinary' and 'Yesterday'. He also directed the London 2012 Olympic opening ceremony.

Dr Thomas Parry Jones OBE - Transforming drink-drive legislation

Dr Thomas Parry Jones OBE (1935-2013) was one of Wales’ most internationally acclaimed scientists and entrepreneurs. Dr Thomas Parry Jones graduated in Chemistry from Bangor in 1958. Dr Thomas Parry Jones developed the electronic breathalyser the ‘Alcolyser’, and a few years later the hand-held ‘Alcolmeter’, which sold in large numbers throughout the world and transformed the way that police forces were able to enforce drink-drive legislation.

Frances Barber - Olivier Award-nominated British actress

Frances Barber is an Olivier Award-nominated British actress with a long and distinguished stage career, who has also appeared in numerous film and television productions. Frances graduated from Bangor University with a degree in Drama in 1978.
graduates.

Mary Sutherland - World’s first female forestry graduate

Mary Sutherland, the first female forestry graduate in the world, graduated from Bangor University in 1916. She went on to have a distinguished career in forestry in both the UK and New Zealand, and founded the New Zealand Institute of Forestry in 1927. A Mary Sutherland Memorial Redwood can be found in Whakarewarewa Forest, and Bangor University now awards the Mary Sutherland prize every year to the best female forestry graduate.

"While touring New Zealand, I feel every forester should visit Mary Sutherland’s memorial amongst the redwoods in Whakarewarewa forest, Rotorua. She was, and still is, an inspiring lady."

Sarah Ellis - Winner of the Mary Sutherland Prize for Best Female Forestry Graduate 2020

Sir Robert Geoffrey Edwards CBE FRS MAE – Nobel Prize winner

Bangor alumnus and Nobel Prize winner, Sir Robert Geoffrey Edwards CBE FRS MAE (1925-2013), graduated from Bangor University in 1951 with a degree in Zoology. Alongside gynaecologist Patrick Steptoe, he developed IVF, a procedure in which egg cells are fertilised outside the body. It’s estimated that more than half a million babies are born following IVF treatment every year.

Bridget Jones - A fictional icon

According to Helen Fielding’s books, Bridget Jones, our most famous fictional alumna, studied a degree in Linguistics at Bangor!
The guiding principle of our university strategy is to be ‘the light on the hill’, describing where we intend to be in 2030 and the journey we are embarking on to get there.

From our North Wales campuses in Bangor and Wrexham, our people are at the heart of this strategy, with four strategic priorities underpinning all that we do – research excellence; transformative learning experiences; an excellent student experience; and a thriving Welsh language and bilingual environment.

We believe Bangor University has a role to play in society. We are working to be a force for good, building on our focus on discovery, sustainability, safeguarding the environment, and promoting economic, social, bilingual, and cultural vibrancy.

You can read our full Strategy 2030 document here: bangor.ac.uk/strategy-2030
Discover Bangor.
With students coming from all over the world and from very different backgrounds, Bangor University aims to create an environment for you to live and study that ensures you can be yourself, take advantage of every opportunity and reach your full potential.

At Bangor, you will meet people from every imaginable community. Your fellow students will be interesting, creative and thought provoking. They will have different opinions to you and may challenge how you see the world. Through the shared experiences of university life, we seek to ensure that all students can embrace their diverse community and learn as much as possible during their time at Bangor.

Our commitment to equality and inclusivity is more than just policy. We make our commitment an everyday practice to ensure that you feel welcomed, respected and valued and have equal access to support services.

The University is fully committed to the principles of the Athena SWAN charter for its staff, a framework which is used across the globe to support and transform gender equality within higher education and research. We have held an Athena SWAN Bronze award since 2011.

Our website provides information about the ways in which we maintain and enhance Bangor’s inclusive community including signposts to support and advice, information on how we promote equality and details about how we maintain a safe campus: bangor.ac.uk/inclusive-community

Proudly inclusive.

Our diverse community

100
Bangor has students from over 100 countries, making up 20% of our cosmopolitan student community.
Welsh language at Bangor.

Bangor is situated within one of the most vibrant, bilingual areas in the UK and both English and Welsh can be seen and heard in all aspects of life.

In the words of J.R.R. Tolkien, Welsh "is of this soil, this island, the senior language of...Britain; and Welsh is beautiful".

Bangor University is leading the way in developing and increasing the opportunities available to use Welsh, contributing to the Welsh Government’s Cymraeg 2050: A Million Welsh Speakers strategy. For those students wishing to study through the medium of Welsh, Bangor makes this possible, with Bangor University having the largest number of lecturers teaching through the medium of Welsh.

Bangor University offers all students the opportunity to learn or develop their Welsh language skills, with a number of modules offered by Canolfan Bedwyr, an online self-study course, plus the opportunity to apply for the Coleg Cymraeg Cenedlaethol Language Skills Certificate.
Our sustainable futures.

“At Bangor University we are working to be a force for good. Our goal is to inspire our academic community, our professional services teams and our students to create a more sustainable world in alignment with our vision to drive success through transformative, innovative, impact-driven research and teaching.

“We believe this University has a role to play in society, building on our focus on discovery, sustainability, safeguarding the environment, and promoting economic, social, bilingual, and cultural vibrancy. As a research-led University and as individuals who care deeply about the world we live in, we want to contribute to solving the world’s challenges, such as climate change, health inequalities, and workforce development.

“We are passionate about promoting a culture and scholarship of environmental stewardship, living in harmony, and caring for the world in ways that meet our economic, social, environmental, and cultural needs. Underpinned by our world-renowned research, we will support the development of Wales as a bilingual learning country with a knowledge driven economy for the benefit of the world and future generations.”

Professor Iwan Davies President and Vice-Chancellor (Strategy 2030)

1st Class University.

(People & Planet University League, 2021)
15th in the world.

(for Sustainability, UI GreenMetric World University Rankings, 2021)
'Sustainability is more than the environment, and it’s more than the work of a single department – it’s in everything we do. Working with the Welsh Government’s Well-being of Future Generations (Wales) Act 2015, and the United Nations’ Sustainable Development Goals, we are committed to making an impact to the challenges our global community is facing.'

Dr Christian Dunn

The UN's 17 Sustainable Development Goals

1: No Poverty
2: Zero Hunger
3: Good Health and Well-being
4: Quality Education
5: Gender Equality
6: Clean Water and Sanitation
7: Affordable and Clean Energy
8: Decent Work and Economic Growth
9: Industry, Innovation and Infrastructure
10: Reduced Inequality
11: Sustainable Cities and Communities
12: Responsible Consumption and Production
13: Climate Action
14: Life Below Water
15: Life on Land
16: Peace and Justice Strong Institutions
17: Partnerships to achieve the Goal
Just some of our impact so far…

**Zero hunger**
An estimated 30-40% of Uganda’s fruit and vegetables are wasted before reaching the market. Bangor University is working with colleagues at Makerere University in Uganda to develop sustainable food packaging alternatives.

**Food waste**
Hungry Dragon is a Bangor University student-led food project, saving surplus food in Bangor. Recently partnered with Bangor Fair-Price Café, they convert surplus fruit and vegetables from local supermarkets into preserves and meals.

**Quality teaching**
The Multilanguage Assessment Battery of Early Literacy (MA-BEL), established by a Bangor-led international group of researchers, is the first freely available, web-based resource that offers a battery of tests in five languages for assessment. Prior to this project, primary beneficiaries in 22 countries lacked objective, high-quality, evidence-based evaluations for early detection of children’s literacy failure.

**Clean water and sanitation**
The University sets itself targets to reduce water use as part of its Environmental Management System. Between 2005 and 2020, total water use was reduced by 42.9% per m² floor area.

**Gender equality**
Enhancing spatial ability to help close the gender gap in Science Technology Engineering and Mathematics (STEM), Bangor University is to contribute expertise to a new Europe-wide project to improve children’s spatial abilities, with the aim to help close the gender gap.

In addition, the Race & Gender module run by the School of Arts, Culture and Language, focuses on the role that sex, gender, ethnicity, and race have played in the creation, reception, and theoretical construction of various forms of film and visual culture.

**Period poverty**
Period products are a necessity not a luxury. That’s why our student-led Period Poverty scheme provides students with free access to period products.

**Affordable and clean energy**
As a University, we understand that our use of fossil-fuel-derived energy is contributing to global climate change. In 2019, we declared a Climate Emergency and announced that 100% of our electricity is now supplied from guaranteed renewable sources.

We have expertise in marine renewables (including mitigating the impacts on marine wildlife) and nuclear energy, vital to continue decarbonising electricity generation, which underpins emissions reductions in other sectors. North Wales is geographically placed to be a leader in environmental technologies.

**Industry, innovation and infrastructure**
A Bangor University entrepreneur scooped the Judges Award from Santander Universities Emerging Entrepreneurs Awards 2020, competing against over 80 entries.

MSc student Jan Lloyd developed Henry’s Cushion, a non-verbal educational aid, which was born out of a conversation with her autistic son Henry and with the invaluable support of the University’s B-Enterprising team, the School of Psychology, Big Ideas Wales, M-SParc, and the Enterprise Hub.
Bangor researchers are actively engaged with industry partners to reduce emissions across a broad range of sectors. Our BioComposites Centre is developing green materials that reduce environmental impact and lock-up carbon, greening the manufacturing and construction sectors and helping to displace concrete and steel. We are also working to reduce the carbon footprint from telecommunications.

**Climate action**

As a University, we understand that our use of fossil-fuel-derived energy is contributing to global climate change. In 2020 we approved a target to reach net-zero carbon by 2030. We are now working to develop our action plan on how to achieve this ambitious target.

**Responsible consumption and production**

In 2019/20 the University diverted 100% of its waste from landfill. Out of the waste diverted, 2% was reused, 59% was recycled and 39% was recovered. 617T of waste was generated in total, a 196T (24%) reduction from the previous year. We aim to reuse/recycle 70% of our waste by July 2025, as laid out in Wales' overarching waste strategy - Towards Zero Waste.
The Bangor Graduate.

As a Bangor graduate, you’ll have the knowledge, understanding, skills and attributes needed to work and live in a way that safeguards environmental, social, economic and cultural wellbeing, both in the present and for future generations.

It is our vision to provide every student and member of staff with the opportunity to develop their mind and passion through enriched and transformative learning experiences.

We are transforming our digital learning and teaching environment to enhance our digital capability, drawing together the use of digital technology, our Transnational Education provision and expertise in bilingualism, to develop our International classroom, so that students are prepared for, and can thrive in, a global context.

To ensure that our teaching meets the needs of our diverse student population, we work in partnership with our students to create a learning environment which is inspiring, supportive and challenging.

Did you know?
TV presenter and explorer, Steve Backshall, is part of Bangor University’s teaching team, sharing his vast experience of the natural world and TV production with students. He’s an inspiration to many students, who’ve grown up watching programmes such as ‘Deadly 60’ and have been inspired to pursue studies in natural and ocean sciences here at Bangor.
'I don't have many regrets, but not studying at Bangor is one of them.'

Steve Backshall
Honorary lecturer and part of Bangor University’s teaching team; naturalist, explorer and presenter
What our students say.

bangor.ac.uk/Magical-Bangor
“Studying at the Bangor Law School has been an incredible experience; the lecturers are extremely helpful and encouraging about helping students plan out their future. The support received has given me clarity for deciding what comes next!

“Bangor’s location is what makes it unique from other universities, there is such peace and beauty in being able to take a break from studies and walk around being surrounded by nature.”
Sabrina Zulkifli
Studying: Computer Systems Engineering
From: Malaysia

“As a smaller city, Bangor fosters a close-knit community which has become my home away from home. The skills and subjects being taught have prepared me for a diverse number of working opportunities.

“The department offers a great student-staff relationship and I’ve developed an easy-going rapport with the lecturers and administration staff. It has definitely made my experience in Bangor wonderful!”
Gawina Fernandes  
**Studying: Computer Systems Engineering**  
**From:** Chippenham, UK

“I’m in my third year of my degree, and my plan for the future is to work in a friendly environment with engineers. I also want to do my Masters in Communication. My lecturers are very friendly and generous; we get a lot of help from them, from both the academic and non-academic side.

“There are also so many clubs and societies at Bangor and joining them for socials is amazing.”
Joe Brittan
Studying: Law
From: Ludlow, UK

"I've immensely appreciated the support afforded to me by lecturers who've enabled me to reach new heights with my degree.

"Furthermore, the opportunities provided by Bangor University have allowed me to grow both professionally and personally!"
“Bangor is one of my favourite places, not just because it is beautiful but because experiencing life in Bangor has had such a positive impact on my personality. Bangor University has provided me with the learning, knowledge, and expertise I was seeking.

“Studying a course like Business Management has given me a thorough understanding of how businesses operate. I feel confident and prepared for the future because of the wonderful staff and people that make students’ time at Bangor a once in a lifetime opportunity.”

Moneeb Rehman
Studying: Business Management
From: Islamabad, Pakistan
Phoebe Iddon
Studying: Philosophy, Religion and Music
From: Bolton, UK

"I love studying at Bangor because of the amazing sense of community, from my course mates to societies, to people I meet at the pub, everyone is incredibly friendly here!"
"Bangor has become a home away from home in the last year, it’s a wonderful place to study. I feel fully supported by both my peers and lecturers. I’m certain there’s no place quite like it."

Phoebe Crewe
Studying: Music
From: Cheshire, UK
James Szewczyk
Studying: Zoology
with Herpetology
From: London, UK

“Bangor is the only place in Europe where those who love all things reptilian and amphibian can study and learn more about this fascinating group of animals. Zoology with herpetology provides a wide range of diversity within modules, all of which are really engaging and facilitating. The course aids me in managing my human crocodile conflict project in Uganda and understand the steps required in carrying out research.

“Bangor is nestled between the stunning mountain ranges of Snowdonia and the tranquil beaches of Anglesey, making it perfect for exploring. The Paddleboarding Society allows you to immerse yourself in these surroundings, whilst also enjoying the activities they have to offer.

“Unsurprisingly, the Herpetological Society has also made my Bangor experience that more special, by bringing in expert speakers to discuss a wide range of topics followed by Q&A, sometimes over a pint at the local pub.

“Bangor offers so much, it’s been an incredible experience living, studying and working here.”
Amy Stout
Studying: Zoology with Animal Behaviour
From: Cardiff, Wales

“Studying Zoology with Animal Behaviour has been an incredible experience, with inspiring lecturers delving into many diverse topics, while surrounded by the amazing biodiversity in North Wales. While at Bangor, I have been able to focus my interests through different opportunities and modules, fueling my passion for a career in zoology.

“One of the reasons I love Bangor is the surrounding landscape and the opportunities it offers, both while studying and when needing a break from the books. Snowdonia and Anglesey offer the perfect escape from hectic university life, especially with societies such as the Paddle-boarding Society, offering a fun way to explore the surrounding areas with fellow students.

“The student community is what makes Bangor special. The size of the city and placement of the University are perfect for students, and if you don’t mind a few hills, everything you could need is on your doorstep!

“In Bangor, it doesn’t take long to settle in.”
George Scarisbrick
Studying: Applied Terrestrial & Marine Ecology with Placement Year
From: Bath, UK

“Bangor is the perfect place to study a Natural Sciences degree such as mine! Not only is it a university of world-leading research, but throughout my course I too have felt part of this research.

“Here in Bangor, you are surrounded by fantastic scenery and habitats, and you’re on the doorstep of Snowdonia!”
Matthew Peill  
**Studying:** Environmental Science
**From:** Lancashire, UK

“Bangor, to me, offers the close-knit community feel of a town, mixed with the buzz and opportunities of a city. Its location contrasts the idyllic mountains with quaint beaches and coastlines and is perfect for study and exploration. Studying Environmental Science in such an awe-inspiring landscape with the knowledge and support of the lecturers has given me the skills I need for the future.”
Andreea Diveica  
**Studying: Sociology**  
**From: Romania**

“The course I am undertaking sits within the School of History, Law and Social Sciences, which means that I have the opportunity to choose from a greater variety of optional modules and thus the opportunity to learn about fields related to Sociology. Because of this, my workshops and seminars bring together students with very different backgrounds and interests, which leads to insightful and engaging discussions and debates.

“The more I explore, the more I love Bangor and the surrounding area. Besides the beautiful and sometimes hidden destinations with amazing views within Bangor itself, the proximity to Snowdonia National Park and the other interesting small towns and villages provide a multitude of opportunities for exploration.”
What our graduates say.

bangor.ac.uk/Magical-Bangor
"Bangor gave me the tools required to succeed in a variety of roles and industries. The analytical skills required throughout my degree have shaped the ways in which I approach tasks in a professional environment.

"My current employer is internationally recognised as one of the most data/metric driven companies in the world. The ability to 'dive deep' that I developed during my degree is now an essential part of my day-to-day life.

"Bangor gave me the tools required to succeed in a variety of roles and industries. The analytical skills required throughout my degree have shaped the ways in which I approach tasks in a professional environment.

"My current role is based in a 270,000m² robotic fulfilment centre, where, day to day, I manage a team of 40-120 people and leaders to fulfil customer orders. Alongside that, I am able to take charge of site-wide projects and initiatives focusing on improving quality, productivity and employee engagement.

"My advice would be to visit Bangor, explore the city and surrounding areas and know that your academic future is in safe hands."

"My time in Bangor was fantastic. The diversity of individuals I was able to meet and make genuine, lifelong friends with was a rare opportunity."

Studied:
BSc Psychology, 2018;
followed by MSc in Consumer Psychology and Business, 2019

"I include my business and psychology background in everything I do."

Sonja Milano

"I left Italy when I was 18, and Bangor University’s Psychology department was recommended to me whilst undertaking a foundation course at EF Cambridge."

"I enjoyed everything about my time at Bangor, from the city itself, to the University’s location; to the professors; the course; my friends; the halls; everything was so perfect!

"What really struck me was the totally different style of teaching, including all the help from the lecturers and also from my fellow students. The way we could interact with the lecturers so easily; the way we could ask any questions and they would be so helpful. It really amazed me how much practical work there was, it wasn’t just studying with books, it was also applying our learning to real life.

"I’m from a small island in Tuscany where there is a very close-knit environment, and I found myself feeling at home at Bangor immediately, as it’s such a friendly community and a great place to be.

"I was introduced to Dr Zigs as I completed a six-week work placement there whilst undertaking my Master’s degree. Dr Zigs makes eco-friendly giant bubble toys; we’re passionate about sustainability and reducing plastic waste; all our products are low plastic and palm-oil free, and we export all over the world. Our founder, Paola Dyboski-Bryant, is also a Bangor graduate!

"I’m now a manager at Dr Zigs; I take care of many aspects of the business including marketing and general administration, and I include my business and psychology background in everything I do. With placements and real-life intervention, I found the job of my dreams. all thanks to Bangor University."
SONJA MILANO

"When I selected my course, I knew I was interested in making a positive difference and driving change, and I wanted to follow my passion. I found, as the course evolved, that it was very much a journey, not only of learning but also of self-realisation and discovery."

"It is hard to pinpoint the best part of my time at Bangor. Not only did I love my course, the flexibility, my tutor and lecturers, but I also took advantage of many other opportunities offered. I studied abroad in Vancouver; I got to go to South Korea on a language and culture programme; I worked with some amazing team members on an internship in the University’s Sustainability Lab. Bangor University really set me up for success! I also met my partner while at university, he had just completed his MSc at Bangor when we met."

"Even though I don't work in a role or sector I initially envisaged, I am able to draw upon and leverage the skills and knowledge I obtained consistently. In my previous role at Amazon, I delivered a sustainability initiative focused on a circular economy style approach to waste management. I consistently draw on environmental theories when completing people plans, looking at sustainable approaches to continuous improvement."

"I now work as a HR Manager for the UK and Ireland at Wayfair. I support the sales and service departments through effective partnership to integrate business principles and priorities into people policies, to deliver the European market expansion, in addition to leading my team and aiding them in their development. My previous roles include Management and HR roles at Amazon, and HR Business Partner for TikTok, after being headhunted for the role."

"Writing this has brought back floods of memories of all the great times and amazing people I met while at Bangor, I will never be able to thank them enough for setting me up for my future. I could never imagine what life would be like now had I not chosen Bangor University; it is without a doubt one of the best decisions I have ever made."

#GraduateSuccess
"I specialised in health psychology, and from there narrowed focus to nutritional psychology, working for Food Dudes Health part-time during my final year. After graduating, I worked for the Centre for Activity and Eating Research, which led to a move to Birmingham to do a PhD in public health.

"Whilst at Bangor, I took part in the Bangor Employability Award and got heavily involved in all the support and activities offered by the careers and employability team, who were amazingly encouraging.

"I also took weekly Welsh lessons at Coleg Menai and enjoyed being involved in the ‘dysgwr’ activities run by Coleg Cymraeg Cenedlaethol.

"I currently work as a lecturer at the University of Nottingham, where I work in the Division of Food, Nutrition & Dietetics as the curriculum lead for social and behavioural nutrition. As the only psychologist in my team, I work closely with my colleagues - mostly nutritional biochemists, dietitians and food scientists - to link my teaching around the "why" of eating behaviour, to their "what" of nutrients and the food system.

"I also founded a social enterprise called 'The Real Junk Food Project Central' in 2017, implementing findings from my studies in the real world, which is still running successfully now and produces over 150,000 meals a year for vulnerable people in the West Midlands.

"I had some great lecturers in the School of Psychology who directly influenced how I teach and support my students today. The School has an enthusiastic community of scholars who see the massive potential in psychology, and I think this is likely why I now 'see the psychology in everything', and value the potential for the role of social science in solving any problem.”
JAKE SALLAWAY-COSTELLO
CO DIRECTOR OF THE REAL JUNK FOOD PROJECT CENTRAL
"What really clinched it for me at Bangor, though, was the departmental staff in the Modern Foreign Languages department, who really helped me to sink my teeth in to university. From encouraging me to speak at Cambridge during my final year, to nominating me for the Staff Choice Award for my work as a Course Rep, I felt supported in being more than just a student.

“My first two and a half years post-university were spent either working in Germany, or working with German-speaking clients. It goes without saying that my degree prepared me for that, but the less obvious benefit was its profound impact on my public-speaking, my resilience, and my ability to take one risk after another!

“I now work at Yipiyap, the UK’s leading provider of in-school tutoring support in Maths, English and Science. My current role is split into two categories: Business Development and Project Management. I establish and maintain partnerships with educational institutions, develop new business models or services, and manage projects with our partners! After a year in this role, I have recently moved on to line management.

“Bangor is a brilliant town and an even better University. My Professors and lecturers were world-leading and truly cared that we got the best grade possible. I took a class during my year abroad in Berlin, and on my first day, the German professor handed me a book that was written by my personal tutor at Bangor. Talk about small world! If that doesn't convince you, I don't know what will!"
Tim Hunt
Studied: BSc Product Design, 2018

“I chose Bangor because the location allowed me to combine my love for outdoor sports with study. Also, the course had an excellent staff/student ratio.”

“What made my time at Bangor special was the approachable staff; real-life briefs; multiple industry placement opportunities were a highlight, plus a great course cohort. Bangor offered a wide variety of support for all aspects of the degree course. This was combined with many opportunities to take part in programmes, courses and classes that developed additional skills, both personal and professional.”

“I currently work at Welcome Furniture as a Lead Designer, which involves receiving a design brief and creating a product offering that provides the highest value for the client and organisation; along with producing photography, written and video media for proposals and brochures. There is also an element of problem-solving production issues encountered with new designs.”

“My time at Bangor provided me with the ability to manage tight time frames and large quantities of work, as well as the confidence and ability to discuss a range of topics with new and well known people.”

“Multiple industry placements were a highlight.”
TIM HUNT
LEAD DESIGNER
WELCOME FURNITURE
"The influence that Bangor had upon both my career and life cannot be overestimated. The way teaching was delivered at Bangor, combined with the excellent academic and pastoral support I received, allowed me to flourish academically, and led to me obtaining a First-Class degree. I very much attribute that great success, not only to my work, but also to the commitment and dedication of the lecturers and the overall quality of the Law School itself.

"Beyond that though, I cannot overstate the support provided by the Law School, both in terms of helping me to obtain work experience placements and its overwhelming encouragement for students to pursue critical extra-curricular activities.

"From a personal perspective Bangor is a lovely, quaint, vibrant city which has so much to offer. I loved my time there, I have some wonderful memories and left with life-long friends.

"From an academic perspective, in terms of achieving success, I'm of the view that Bangor presents every student with an excellent foundation for the same. It's a university with first-rate facilities and truly committed staff, whose main goal is to see you succeed. But it's also a university where, due to its modest size, every student has the opportunity to be heard, listened to and appropriately supported."

Adam Steven Gulliver

'I cannot overstate the support provided by the Law School.'
ADAM STEVEN GULLIVER
BARRISTER
SENATE HOUSE CHAMBERS
"I knew I wanted to study a subject which I could use later in life to help people. I was always interested in Biology, but did not want to learn about animals or plants; I was interested in how the body works, how I work.

"When I saw that Bangor offered Cancer Biology, I knew that it was what I wanted to do.

"My course at Bangor University provided me with the fundamental knowledge about Cancer Biology, which I have built on since. My course enabled me to specialise very early on in a subject which I loved and wanted to develop a career in. It opened a lot of doors for me to have specialised this early on and get accepted for a PhD at the renowned German Cancer Research Centre.

"In my current role, I lead and manage the execution of one or more clinical studies, from study startup through database release. As a core member of the Study Team, I have regional oversight, drive decision making, provide leadership, and champion consistent quality and excellence. I have to assess risks and determine the best mitigation strategies and make sure that my clinical team meets the set expectations, to ensure we keep our patients safe and the collected data to regulatory standards.

"By studying, I learnt how to self-motivate myself and to always give my best. I learnt that hard work pays off.

"By volunteering at RAG and being part of the Bangor Athletics Club, I learnt how to motivate people and how to engage with others. I learnt how to solve issues and manage conflict, to form part of some amazing teams."

'Bangor opened a lot of doors for me.'
Adam Hawker  
**Studied:**  
BSc Biomedical Science, 2016

"I decided to study at Bangor due to the smaller size of the city campus, the easy access to open spaces to help unwind, and the excellent reputation the University has for biological and medical sciences."

"I initially wanted to study medicine, and soon realised during my A-levels that I would not be able to apply via the direct route, but as I researched into careers in healthcare, I discovered the area of biomedical science. I then found out about the Institute of Biomedical Science, and how an accredited degree can enable you to progress into a state registered role within the NHS. Bangor University provided an accredited degree which would fast-track my career into being a state registered scientist."

"Bangor University is well known for its societies and groups that are free to join, which makes socialising and building friendship groups so easy. You can try out as many different sports and hobbies as you like until you find something that you truly enjoy. The hiking group’s climb of Snowdon is a highlight that every fresher must do!"

"Since graduating, I have progressed from a laboratory assistant, to a trainee biomedical scientist, to being state registered and now gaining a place on the clinical scientist training programme."

"My current three-year training course involves me rotating around the different areas of infectious science within the hospital setting and will enable me to research and implement new high-quality technologies to aid the detection and diagnosis of infectious diseases, which is something the Covid pandemic has highlighted as critical in a modern healthcare system.

"Studying Biomedical Science at Bangor University gave me the practical skills and theoretical knowledge I needed to progress into a hands-on laboratory role. The Bangor Employability Award also gave me the initiative to go out and gain valuable work experience that enabled me to quickly progress to being a HCPC registered Biomedical Science in Microbiology."

"Bangor helped to fast-track my career in science."

CALLUM MURRAY
CREATIVE DIRECTOR
CUFFLINK
Callum Murray  
Studied:  
BSc Creative Technologies, 2019

"I decided to study at Bangor University after taking a gap year, as I wanted to further my education in the field of computer science and design. The location itself was a big plus for me, being an adventurous individual who likes the outdoors!"

"The course itself allowed me to explore both the creative and technical side of computer programming and design. The flexibility of the course modules and projects allowed me to discover an interest in UX design that would lead me to my first job in the industry."

"As Creative Director at Cufflink, my role is incredibly varied. No two days are the same and that's just part and parcel of working for a start-up. There is always a new challenge to be completed. But for the most part, I lead the overall brand and creative direction of the company with a primary focus on the UX/UI design of our mobile application along with leading our marketing efforts."

"My third-year dissertation project was a great help to me on the road to my current career. The introduction of a final year presentation session enabled me to speak with local businesses about my project and skills, and this is how I met my current employer."

"The teaching offered at Bangor University is top-tier and the courses and modules are designed to give you the cutting-edge skills you need to enter the working world."

"Bangor University has it all; you will enjoy a good social life, make great friends, and it will really help push you out of your comfort zone and try something new!"
"It was at Bangor where I truly learnt what midwifery was. I was taught by an amazing group of midwives, all of whom shaped me into the midwife I am today. Rural North Wales midwifery is where I would encourage anyone choosing a midwifery career to start out.

"Midwives are privileged people who get to share precious moments with women, and we are entrusted by them to play a vital role in their childbirth experience. Every day is a special day.

"The blended learning of theory and practical course elements at Bangor prepared me to qualify as a confident midwife ready to embark on my career in the NHS.

"During my time at Bangor, I completed the Employability Award, and I also become a course representative, and eventually I was representing midwifery education in North Wales at a Welsh National level.

"Upon graduation I was appointed as a board member to the British Journal of Midwifery, and then as board member to the National Practising Midwife Journal.

"If I have learnt anything during this global pandemic, it is to be thankful for the present. I am extremely happy and content with my job as a midwife.

"Bangor will always be my second home and the people I met will always be considered friends and family."

Jonathan Cliffe

Accredited
Bangor University provides the only UNICEF Baby Friendly Initiative (BFI) accredited midwifery programme in Wales.

"Bangor University found me. After a lengthy UCAS application I made it to the University's reserve list. Initially, Bangor was not my first choice but I am so glad it found me. The people, the views and the Welsh language made my time at Bangor one of the best three years of my life.

"I truly learnt what midwifery was at Bangor."

Jonathan Cliffe

HEAD OF SOCIAL MEDIA
ENTREPRENEURS CIRCLE
"My decision to attend Bangor University was based on a recommendation from a friend, and after much investigation of my own, I found that Bangor was the ideal university for me.

"Bangor has some of the elements of a town with the benefits of a city and is ideally situated for outdoor activities. If tourists are clamouring to get there, why wouldn't you want to live and learn there?

"I really enjoyed my Business A-Level, especially the economics side, so Business Economics seemed the ideal course for me. As I studied my undergraduate degree, my interests started to develop, thanks to the optional modules. I found Economics interesting, but I loved Marketing and Consumer Behaviour. This really informed my choice for my Postgraduate degree in Business with Consumer Psychology.

"I work for a company that is passionate about helping small businesses to grow. They're the backbone of the economy, responsible for employing around 60% of the UK population, and they are left to figure things out almost entirely on their own. My role is to offer strategic advice for digital marketing to our members, as well as being responsible for social media. Whether that's on a 1:1 basis, during weekly support clinics, or at national events.

"I met so many people at Bangor who are legitimately lifelong friends; we'd be away most weekends hiking and climbing. I definitely grew into more of who I am at Bangor University. I also met my husband there, so it really has had a lasting impact on my life."

Optional modules helped to develop my interests.'
"Computer Science is an amazing topic to study because it relates to so much of the modern world. Having a good understanding of the fundamentals of computing will be useful, regardless of what you end up doing later on in life.

"My interest in pattern recognition and machine learning led to me to collaborating on projects with one of my Professors. This work resulted in two publications which strongly supported my PhD application at the University of Nottingham.

"In my current role at the Health Informatics Centre, we provide secure research computing environments for bioinformaticians to analyse data which they wouldn't normally be able to access due to the sensitive nature of medical data. Most of my work involves trying to improve this research environment in ways which are reproducible and easy to deploy, while maintaining security and good user experience.

"The academic opportunities at Bangor were great; I get to work with brilliant people today because of the path Bangor put me on. It's a small city, but this leads to close friendships, so much so that I'm still living with my housemate and friend from my second year.

"I think Bangor offers everything you would want from university life - opportunities for academic excellence, the freedom to respectfully explore nature, and probably too many pubs!

"Go there with an open mind, work hard, and enjoy yourself. You will leave with great memories and a quality degree."

Dr Aaron Jackson

'Computer Science relates to so much of the modern world.'

Dr Aaron Jackson

"Bangor is a really nice place to be with a national park only a short bus ride away. Bangor also offered me my place to study from an interview, and prioritised my interest and passion for Computer Science over whether I had enough A-Levels in unrelated subjects.

"Computer Science is an amazing topic to study because it relates to so much of the modern world. Having a good understanding of the fundamentals of computing will be useful, regardless of what you end up doing later on in life.

"My interest in pattern recognition and machine learning led to me to collaborating on projects with one of my Professors. This work resulted in two publications which strongly supported my PhD application at the University of Nottingham.

LINDSAY WALKER + ENLLI FYCHAN OWAIN
The Welshman is a documentary about the life of Owain Williams, one of the founders of Mudiad Amddiffyn Cymru (the Movement for the Defence of Wales), who was convicted for planting an explosive device on the site of the Tryweryn reservoir. The film was created by Bangor University graduates, director Lindsay Walker and producer Enlli Fychan Owain, who is Owain Williams’ daughter.

Lindsay Walker
Freelance Director and Assistant Editor
Studied: BA Creative Studies and Media, 2013; MA Cinematography and Film/Video Production, 2014

"My studies at Bangor University really helped me be pro-active, the biggest thing it taught me was the beauty in collaboration. It enabled me to explore my creativity and gave me stepping stones into the industry.

"I am absolutely over the moon that my most recent film The Welshman has won a BAFTA! Being at University also taught me how to be resourceful - I made The Welshman with zero budget and that is definitely a skill I mastered with my peers at Bangor."

Enlli Fychan Owain
Producer
Studied: BA Creative Studies, 2013

"I enjoyed Creative Studies because it gave me the opportunity to try out a few different elements that all related to my interest in media. I learnt a lot about PR and this really helped us promote The Welshman on social media, with over 25,000 views in 2 days, the film trailer almost went viral!"

'A film created by two Bangor University graduates, telling the story of the drowning of the Gwynedd village of Capel Celyn in the 1960s, has won a BAFTA Cymru award in the Short Film category.

“We’re over the moon to have won a BAFTA!”

Lindsay Walker and Enlli Fychan Owain

bangor.ac.uk/Magical-Bangor
Wales’ first dedicated science park.

Part of Bangor University, Menai Science Park, or M-SParc for short, is where exciting and cutting-edge companies in the science and technology sectors - particularly the low carbon, digital and life science sectors - make their home and receive support to develop their businesses.

M-SParc enables Bangor University to be at the forefront of research impact and industry collaboration whilst providing opportunities for graduates, people who are under-employed or who wish to upskill, and those wanting a career change. The Skills Academy at M-SParc has been set up to bridge the skills gap in North Wales, particularly in digital, science and technology and the creative fields, providing opportunities including degree apprenticeships, work placements and career opportunities.

“M-SParc is the ecosystem that brings academia, business, industry and enterprise together. We encourage Bangor University students to take work placements and internships with our tenants - with over 70% of internships becoming careers here at M-SParc! Our M-SParc Academy provides further opportunities for graduates to gain meaningful employment opportunities.”

Pryderi Ap Rhisiart
Managing Director, M-SParc

“As a Graduate from Bangor University, I’m now part of an apprenticeship at M-SParc called Skills Academy. It’s been a massive help in giving me much needed industry experience and an insight into how to operate within this area of employment. This means when I finish my time here at M-SParc, I will have the necessary industry understanding and experience to move forward into further employment.”

Kieran Hughes,
Software Developer,
Computer Science Graduate, Bangor University

"As a Graduate from Bangor University, I’m now part of an apprenticeship at M-SParc called Skills Academy. It’s been a massive help in giving me much needed industry experience and an insight into how to operate within this area of employment. Kieran Hughes,
Software Developer,
Computer Science Graduate, Bangor University
We’re collaborating with the likes of Vodafone, Fibrespeed and Comtek to tackle digital inequality by delivering high-speed internet to more than 1 million people, revolutionising digital signal processing and ensuring the future sustainability of internet communications through our £5.5m Digital Signal Processing Centre (DSP).

Bangor University’s DSP Centre is the first of its kind in the UK.

“The research that we do here acts as a glue to not only develop digital systems which will make a national and global impact but bring industry-leading businesses together to work on these plans.”

Dr. Roger Giddings, Deputy Operations Director, DSP Centre of Excellence, Bangor University

Our BioComposites Centre’s latest mission has been to save millions of tons of waste from food production. Collaborating in a £3.95m research project with Tate & Lyle and other food giants across Europe now means this waste can be used as plant-based alternatives to animal protein used in food products.

“The BioComposites Centre’s collaboration with Tate & Lyle is hugely important in enabling ground-breaking, globally important research to help find solutions to the bigger societal challenges, including sustainable food production.”

Dr. Adam Charlton, Senior Research Fellow, BioComposites

Unique in its offering, Haia’s translation service now allows multiple language users to interact seamlessly with each other.

“Haia’s translation service is on track to be more accurate than Teams and Google. Starting with Welsh, which is not prioritised by any other online events platform, we’ll then add further languages.”

Anne Burke, Co-founder Haia
NHS Support for Health Services

In a unique collaboration with the NHS, our MSc Counselling students provide approximately 1500 hours of counselling to over 200 clients a year. Many of our Psychology degree students continue with their studies onto the MSc because of this placement opportunity.

“The collaboration between Primary Mental Health and Bangor University adds an invaluable layer of support to the NHS during times of great need in the local community, enabling students to gain valuable skills and knowledge, helping to develop a career in counselling.”

June Lovell, Manager, Betsi Cadwaladr University Health Board’s Primary Care Mental Health Counselling Service

Cufflink Creating a safer digital world

Cyber security innovators Cufflink are making global advancements in keeping personal and business information safe, and free from data hacking, with the help of Bangor University.

50% of the company’s workforce are Bangor University graduates and Cufflink is benefitting from access to research partnerships with the University’s data, privacy and transparency experts.

“It’s our vision for Wales to be at the forefront of the global cyber security marketplace, harnessing the brightest and best from local universities, delivering highly skilled opportunities to tackle a huge global problem.”

Billy Williams, Director & Co-Founder, Cufflink

Siemens Healthineers Optimising medical technology

Research from Bangor Business School has created important financial savings for local global leaders in medical technology, Siemens Healthineers.

By examining the manufacturing processes of the company’s diagnostic kits, doctoral research student, Bukola Adetonwa, was able to make recommendations on efficiencies and sustainability.

“The research project has made significant improvements to the department and our ability to effectively share knowledge. The success was down to the close collaboration, allowing the research approach to be adapted rapidly as challenges were encountered.”

Dr Rachel Morris, Head of Technical Operations, Siemens Healthineers, Llanberis.
**Menter Môn**
Harnessing tidal energy

Plans for the world’s largest tidal stream energy site are set to go ahead off the coast of North Wales, generating enough clean energy to power 180,000 households, and collaboration with Bangor Business School has been instrumental in moving the project forward.

By assessing the impact of the scheme on local industry and establishing a strategy to ensure local economic benefits are maximised, the project run by Anglesey social enterprise, Menter Môn, has secured the support of affected communities and stakeholders.

“Through this collaboration, I was able to bring a real-world case study into the classroom to look at how projects that tackle climate change can also have a positive economic impact.”

Dr Edward Thomas Jones, Bangor Business School

---

**Global Nuclear Leaders**
Pioneering clean energy

We are developing world-leading capability in nuclear science and engineering at the University’s Nuclear Futures Institute, in collaboration with key global players in nuclear innovation.

Focusing on the development of existing and emerging nuclear power technologies, we are making a significant impact on the UK government’s commitment to reach Net Zero by 2050.

“North Wales is one of the UK’s carbon-free energy hubs, and Bangor University is at the heart of global impact research in clean energy.”

Professor Bill Lee, NFI Director
Our research impact.

bangor.ac.uk/Magical-Bangor
Our global impact.

#Research

More than three-quarters of Bangor’s research is recognised as either world-leading or internationally excellent. REF 2014

“The planet’s ability to support a stable and resilient ecosystem is increasingly being eroded by human activity and there is growing evidence, and consensus, that we are approaching a point at which significant and potentially irreversible changes will occur to the environment and our own culture. The challenge is to move to a sustainable human society through a circular economy.”

Professor Paul Spencer, Pro Vice Chancellor – Research and Innovation / Head of College: College of Environmental Sciences and Engineering
Ending global food poverty

Pioneering research led by Bangor University has improved the livelihoods of more than 5 million households across India and Nepal, through our development of a new rice variety that can cope with the harsh growing climates in these countries.

This new variety provides an estimated annual benefit of £17 million to the poorest farming households in India alone.

“[When I consider the scale of the Bangor-led team compared to projects taking place at big International Research Centres, I am really proud that our work led to a similar scale of success.]”

Dr Katherine Steele, Research Lead & Senior Lecturer in Sustainable Crop Production

Revolutionising big business

A pioneering forecasting method developed by a Bangor Business School Professor is changing the processes of global companies, including Uber, Amazon and Bosch.

The Theta Method is the brainchild of Professor Konstantinos Nikolopoulos and enables optimised stock level forecasting within 10 milliseconds.

“Bangor University’s research focus, and the full support of visionary academics enabled me to move the Theta method to the next level, cementing it as the ultimate benchmark in industrial forecasting.”

Professor Konstantinos Nikolopoulos, Professor of Decision Sciences & Business Analytics from 2010 to 2020

Transforming mental health

Bangor University’s Centre for Mindfulness Research & Practice (CMRP) was the first university-based centre established in Europe, also leading the world’s first Masters program in this field. Techniques developed by our researchers are now used by most Mindfulness centres across the world, making a global impact.

“[The CMRP has been at the forefront of the uptake of mindfulness training in the health service, workplaces, the]”

Professor Rebecca Crane, Professor in Psychology & Director, Centre Mindfulness Research and Practice

Fact:

Free mindfulness sessions for all students
Combating COVID-19

When the global pandemic first hit, Bangor University researchers became the first to develop and apply Covid-19 monitoring in wastewater in the UK. This is now providing real-time evidence of levels of community infection.

Now collaborating across the UK, Nigeria and South Africa, the team is implementing monitoring systems across the globe, providing critical information to inform local solutions.

Fact: £6 million was awarded to the University in Covid-19 research grants.

Groundbreaking bilingual benefits

By introducing a radical new method from the field of economics, researchers at Bangor were able to measure children's thinking skills more accurately and comprehensively than ever before, showing that bilingual children are on average 6.5% more efficient in their thinking skills than monolingual children.

"These positive results highlight that learning two or more languages can have even more benefits for children's development. This is important for us here in Wales and indeed for bilingual communities across the world."

Dr Athanasia Papastergiou, Lead Author, Lecturer in Bilingualism

Protecting conservation and community

Bangor-led research is ensuring forest conservation does not come at the expense of the world's poorest people, by influencing how governments across the globe reduce the negative impacts of their climate control policies.

"Conserving and restoring tropical forests is vital but this cannot be achieved without the genuine involvement of local communities. Our work aims to put local people at the heart of discussions with the aim of delivering more effective and equitable forest conservation."

Professor Julia Jones, Joint Research Lead & Professor in Conservation Science, Bangor University
Driving athletic performance

In collaboration with UK Sport, researchers at Bangor are undertaking world-leading research. Exploring the identification of high-level sports performers through cutting edge talent development systems, researchers are asking the question: ‘What does it take for an athlete to truly thrive?’

Findings from the Pathway to Podium research project have already been implemented by Swim England, GB Hockey, and British Canoeing.

Preserving natural ecosystems

Research conducted by a Bangor Masters student found that drug concentrations had quadrupled in nearby rivers during and after the Glastonbury Festival – suggesting long-term effects to the ecosystem.

This research has been picked up internationally and has raised concerns that pollutants from music festivals may well be a global issue.

“The findings of such research filter into our degree content immediately, at times before it is widely available across the sector. Our students stand out from other Sport & Exercise Science graduates by taking this learning to potential employers.”

Dr Gavin Lawrence, Senior Lecturer in Sport & Exercise Science

“Preserving ecosystems is a crucial aspect of our work. By understanding the impact of events like music festivals on water quality, we can contribute to the protection of natural habitats.”

Dan Aberg, Masters Student School of Natural Sciences

Pioneering prosthesis

By using human movement science, our research academics are collaborating with prosthetics development company, Ambionics, to develop effective new upper-limb prostheses for young children, improving quality of life and independence for infants with limb loss.

“Our research aims to improve understanding of fundamental principles that govern how the developing brain controls the limbs, and external devices in particular.”

Dr Simon Watt, Senior Lecturer, Psychology, Bangor University & Co-Lead Researcher

“The basic science principles for how an infant learns to use prosthetics effectively is poorly understood.”

---

BANGOR.AC.UK/MAGICAL-BANGOR
Safeguarding against natural disaster

Results from a multi-million pound research project, of which Bangor is a key player, will help understand the interactions between our oceans and atmosphere, improving extreme weather forecasting, and ultimately informing governments where to invest in flood defences and land change policies.

“The ocean's role in climate and weather is vital and Bangor’s contribution is key to answering these questions.”

Dr Yueng-Djern Lenn, Reader in Physical Oceanography, Bangor University Lead Investigator for ArctiCONNECT

Leading microplastics research

Bangor University was one of the first institutions to research the presence of microplastics in inland waters with a pioneering UK study covered in the media around the world in collaboration with Friends of the Earth.

Since then, we have established a number of high-profile projects looking at the presence and movement of microplastics in rivers, seas and oceans around the world.

“Such work is vital if we are to understand the scale of the plastic pollution crisis we are facing - and crucially, what we can do about it. Having such a multidisciplinary approach is the only way to meaningfully tackle the environmental catastrophe, and Bangor University is leading the way in doing so.”

Dr Christian Dunn, Senior Lecturer, Natural Sciences; Director, Plastic Research Centre & Associate Pro-Vice Chancellor for Sustainability.
STUDYING AT BANGOR
Studying at Bangor.
Academic Schools and Colleges.

The academic activities of the University are grouped into three Colleges:

**College of Arts, Humanities and Business**
- Bangor Business School
- School of History, Law and Social Sciences
- School of Arts, Culture and Language

**College of Environmental Sciences and Engineering**
- School of Computer Science and Electronic Engineering
- School of Natural Sciences
- School of Ocean Sciences
- The BioComposites Centre

**College of Human Sciences**
- School of Educational Sciences
- School of Medical and Health Sciences
- School of Human and Behavioural Sciences

***Other modes of delivery, including part-time, distance and dispersed learning may be available for this course - please see website for details.
PLACEMENT YEAR
Placement Year.

'My placement year was one of the most enjoyable of my life'

A placement year provides you with a fantastic opportunity to broaden your horizons and develop valuable skills and contacts through working with a self-sourced organisation relevant to your degree subject.

The minimum period in placement (at one or more locations) is seven calendar months; more usually you would spend 10-12 months with a placement provider. You would normally start sometime in the period June to September of your second year and finish between June and September the following year. Placements can be UK-based or overseas and you will work with staff to plan and finalise the placement arrangements.

You will be expected to find and arrange a suitable placement to complement your degree and will be fully supported throughout by a dedicated member of staff at your academic School and the University’s Employability Service.

Don't worry about finalising this before you join us, you will have the opportunity to fully consider this option when you have started your course at Bangor and can make an application for a transfer on to the placement year.

"My placement year was one of the most enjoyable years of my life! Based in a gorgeous part of the UK, the New Forest, I conducted various jobs associated with wildlife research, and gained valuable experience of working in the real-world. Not only has my placement year provided me with skills that will prove invaluable to my future, I'm also more sure about what I specifically want to do after university. Not to mention the amazing people that I met throughout the year!"

George Scarisbrick
Studying: Applied Terrestrial and Marine Ecology with Placement Year
Experience the world.

Depending on your course, you may be able to take an International Experience Year where you study or undertake a work placement or internship abroad during your degree. There are a wide variety of destinations to choose from all over the world.

Studying or working abroad during your degree is the opportunity of a lifetime. Not only does it give you the opportunity to enhance your study experience, but you’ll also get to experience and understand new cultures, create an international network of contacts and gain a global perspective on your subject area.

With international experience of this kind, you’ll broaden your horizons and really improve your career prospects.

bangor.ac.uk/international/exchanges

“I went to Koblenz in Germany to work as a translator for a company in my year abroad. I was surrounded by fantastic colleagues and learnt so much about my target language, the world of work and daily life in a different country. Having the chance to go abroad made me so much more confident about my continuing studies here at Bangor and future plans.”

Samuel Dickins,
Studying: Chinese and German with International Experience
'Bangor University really set me up for success! I studied abroad in Vancouver and took part in a language and culture programme in South Korea.'
The Foundation Year programme provides an excellent introduction to studying a subject at university and will provide you with the knowledge, skills and confidence required to study at degree-level.

Foundation year courses are ideal for those who may not have the required qualifications for the degree-level course or those looking to re-enter education.

During the Foundation Year, you will focus on developing your academic skills and subject-specific knowledge.

On successful completion of the Foundation Year you will progress on to the first year of the relevant degree course.

There is also an option for international students whose school-leaving qualification is not equivalent to the British school-leaving qualification to take a 'Year Zero' at Bangor University International College (BUIC), on the Bangor campus, before progressing on to the degree-level course.
Bangor University’s Students’ Union has a very active volunteering arm that dedicates a total of around 600 hours per week to community projects.

Student Volunteering Bangor (SVB) is the volunteering arm of Undeb Bangor’s Student Opportunities Department, and has been continuously providing community projects in and around the Bangor area since 1952.

There are now over 50 regular volunteering projects, which are split into the following subcategories: Mental Health Projects, Children’s Projects, Environmental Projects, Elderly Projects and Community and Sport Projects.

SVB has decades of experience working closely with charities, organisations and schools around Bangor and North Wales, as well as further afield, nationally and internationally. Some of the organisations include: the NHS; North Wales Police; Keep Wales Tidy; Gwynedd Council; Age Cymru; Macmillan Cancer Support; Riding for the Disabled Association and Alzheimer’s Society.

Volunteering gives you the opportunity to give something back to the community, to make new friends, develop new interests and gain valuable experience ready for when you graduate from Bangor University.

“The students who volunteer often talk about the difference they make to the community of Bangor and our local environment. Whether it’s delivering food parcels to the vulnerable, helping individuals with disabilities to ride horses, or litter picking and creating safer spaces for our hedgehogs, there’s so much fulfilment in knowing that you’re making a difference!”

Katie Tew
Vice President for Societies and Volunteering
The Tea Party is SVB’s oldest project, and the first event was held in 1952, 70 years ago! It is now a tradition at Bangor, and sees Bangor students joining the city’s elderly residents, providing light refreshments and an afternoon of entertainment.
STUDENT SUPPORT

Supporting you.
Supporting you.
At Bangor we place a high priority on caring for and supporting our students. From managing your finances to finding a graduate job, our services are here to help you make the most of your time at university. From the moment you arrive you'll be given as much help and support as you need.

Student Support Services include:
- Student Counselling Service
- Mental Health Advice
- Partner GP Surgery
- International Student Welfare
- Chaplaincy team
- Disability Services
- Study skills support
- Peer guide scheme

We offer study skills support with the transition to university and on-going support to help you to get the most from your academic studies.

"I was diagnosed with dyslexia at Bangor. It put so many things into perspective for me and the University helped develop tools to assist me. This really did help with my self-confidence."

Claire Woolgrove  
Business Economics graduate
'Student Support at Bangor is brilliant; if I had a question about lifestyle, housing, jobs... It was so easy to find help when I needed it.'

Sonja Milano, BSc Psychology and MSc Consumer Psychology graduate
Enhanced employability.

Not only will we introduce you to employers and opportunities through our state-of-the-art employer portal, but we’ll give you the confidence and skills to succeed when you meet them.

We’ll help you with your CV, give you one-to-one support and an easy way to book a chat with us if you need help with developing your career.

You’ll even have the chance to meet employers and recent graduates during our annual careers festival.

Above all, we understand that the world of work after graduation can be daunting and we’ll be there to guide you through it - this includes supporting you after you graduate for up to three years.

Some of the resources and services on offer include:

- A year-round programme of individual guidance, workshops and employer talks
- Help with finding part time job opportunities
- A paid internship scheme within the University’s academic and service departments
- Learn about and find work experience opportunities, including placements and internships
- Search for graduate jobs
- The Peer Guide Scheme – which will help you develop interpersonal and organisational skills that employers value
- B-Enterprising – a programme to develop your enterprise and entrepreneurship skills
- The Bangor Employability Award, which is open to all students, taking you through all the steps you need to take to explore, prepare and apply for your dream career through online and face-to-face interactive tasks and workshops
- Support with your job search and career development for up to three years after you finish your course

Lifelong Learning.
Perhaps you are returning to your studies following a change in career or juggling the challenges of studying whilst taking care of a family?

We understand that you may have other commitments and responsibilities; that your academic and social approach to university life may vary; that you will have had more life experience and that you may have taken a different path to higher education.

We offer a range of support services, including a dedicated Mature Student Advisor, to support your university studies.
A home from home.

Over 2,500 international students from 120 countries choose to study at Bangor University, making up over 20% of our total student population. You will become a part of a truly international community, allowing you to make the most out of your time studying with us.

From collecting you from the airport when you arrive, to our International Student Ambassadors who run events for you throughout your studies, we aim to make you feel right at home. We also provide a guarantee of a place in our student accommodation for all first-year students who apply by the published deadline.

Supporting you
We pride ourselves on supporting our students every step of the way and have a range of support in place. These include our International Student Support Team, who can provide a wide range of advice on living and studying in the UK, on matters including employment regulations, welfare issues, living in Bangor, healthcare, immigration, and visa applications.

Peer Guides and Student Ambassadors are current students trained to help support you throughout your study. There are also numerous international societies to get involved with, run by Undeb Bangor, our Students’ Union. Getting involved will help you make new friends and build the support network you need to thrive.

Scholarships and finance
We have a range of scholarships available to our self-funded international students and Bangor is considered as one of the most economical places to study in the UK. bangor.ac.uk/international/scholarship

Language skills
If you do not have the required English language level for undergraduate study you can enrol on a pre-sessional English course at Bangor. The length of course will depend on the IELTS (or equivalent) grade that you currently have.

For more information about the exciting opportunities available to you as an international student at Bangor, please visit our web pages: bangor.ac.uk/international
Money support.

Your time at university should be enjoyable and rewarding, and we recognise that it’s important it’s not spoiled by unnecessary financial worries.

We aim to provide you with the information and support that will enable you to get the best from your university experience.

The Money Support Unit is part of the Student Support Team and the experienced members of staff can provide advice, information and guidance on all aspects of student funding, including budgeting, funding for courses, hardship funds, bursaries and scholarships and support for student carers.

You can find out more about the financial support available by visiting: bangor.ac.uk/studentservices/moneyadvice
We place a great emphasis on student support, and the University is keen to offer extra help to you, wherever possible. We have a range of bursaries and scholarships designed to help you support yourself financially through your studies.

The University also has several other awards available for certain eligible groups, such as students who come from financially disadvantaged backgrounds, those of you with academic/sporting excellence or those studying through the medium of Welsh.

For more information on the bursaries and scholarships available and how to apply please visit: bangor.ac.uk/scholarships
Your application.

To apply for a course, visit UCAS.com and follow the simple steps. If you are applying from outside the UK, you can apply either through UCAS (as above) or through our direct application service at bangor.ac.uk/international.

Once you have applied, we will consider your application. If you receive an offer to study with us we will keep you up to date with opportunities to find out more about your course and what to expect when you join us. This will include an invitation to attend one of our applicant days. If you are unable to attend any of these events there are plenty of opportunities to experience virtual and online open days, as well as private visits.
Our facilities.
#Facilities

Libraries
Our four libraries, some open 24 hours, provide a range of attractive study environments including collaborative work areas, meeting rooms and silent study spaces. They house an extensive collection of books and journals, complimenting a manuscript collection, and a web-based catalogue to access e-books, journals and subject guides.

Archives & Special Collections
We house one of the largest university-based archives not only in Wales, but also the UK. Our Special Collections include rare collections of non-print and print material.

'We house one of the largest university-based archives not only in Wales, but also the UK.'

Simone Barbaresi,
Director of Digital Services
# Facilities

**Digital Services**
We have over 1150 computers available for your use. Many PC rooms are open 24 hours a day.

**Wi-Fi**
Wi-Fi is available across campus and in all Halls of Residence and is really easy to connect to.

**Social learning spaces**
There are social learning spaces across the campus, which include free Wi-Fi for our students. These spaces are the perfect place to carry out group work and catch up with work between lectures.

**State of the art lecture theatres**
Our lecture theatres are located across the campus. We also have seminar rooms for small group teaching.

---

#1 Best University for Wi-Fi. (Student Crowd 2021 University Awards)
Labs
State of the art specialist research labs and practical teaching labs provide modern and well-equipped spaces for research and learning.
As a University which provides strong support for research activities, Bangor has a number of subject-related specialist resources that include:

**Environment Centre Wales**

This is where our world-leading academics conduct environmental research to find sustainable local solutions for environmental issues, such as pollution and flooding.

It’s a partnership between the Centre for Ecology and Hydrology and Bangor University, bringing together environmental scientists and students, whose combined scientific knowledge and experience cuts across traditional academic boundaries. The building itself is purpose-built and environmentally friendly, demonstrating many aspects of environmental and sustainable construction including use of locally sourced materials such as Welsh oak and slate.
Sport, Health and Exercise Sciences

Sport, Health and Exercise Sciences facilities include the Physical Activity for Health and Wellbeing Centre (Canolfan PAWB Centre) which includes a large teaching lab and two exercise physiology labs. Other facilities include two research physiology labs with environmental and high-altitude chambers; a dual-energy x-ray absorptiometry (DEXA) scanner; a water immersion laboratory; psychomotor experimental rooms and 3D motion analysis laboratory; psychology testing labs, and more!
Our own ship
Training the next generation of marine scientists, the Prince Madog is a state-of-the-art, purpose-built research vessel which enables marine scientists to study the biology, chemistry, geology and physics of our seas. Students take regular research field trips on the vessel.
FACILITIES
#Facilities

Natural History Museum
The Zoology Collection began as a teaching resource and is still used as such today. It consists of approximately 40,000 pieces, and approximately 500 of these are on display in the University’s Natural History Museum. The Museum, housed in the Brambell Building, stores and displays a vast variety of skeletons, skulls, taxidermy, antlers, eggs and specimens preserved in spirit jars.

Microfabrication cleanroom
We are one of the few universities in the UK to offer undergraduate students hands-on time fabricating devices in a cleanroom environment as part of the School of Computer Science and Electronic Engineering’s facilities. The cleanroom at Bangor is a Class 1000 facility built around photo-lithography and has the capability to manufacture devices to 1 micron resolution.
# Facilities

## Music and Theatre

Dedicated music facilities include two professional concert halls, a recital hall, a soundproofed practice suite, six Steinway concert grand pianos, and four electroacoustic studios equipped to international standards for composition, research and recording. Our theatre and performance work benefits from large, professionally equipped public performance spaces with full lighting and technical facilities, and studio spaces for rehearsal and performances.

Bangor University has been making music for more than a hundred years. 2021-22 marked the centenary of Evan Thomas Davies’ appointment as the University’s first full-time Director of Music. The University celebrated with a host of musical treats to highlight the diversity of sounds over a century.
Media
Students have access to a range of top quality digital cinema production equipment, which they are able to borrow for filming on and off campus. Our main production hub houses industry-standard facilities including a professionally equipped radio studio, audio editing suites and digital video editing suites running a range of professional software packages. These are located alongside dedicated teaching rooms, co-working spaces and auditoriums. Our new arts and innovation centre, Pontio, includes a 200-seater cinema space with Dolby Surround Sound.

Modern Languages
Our students benefit from a range of dedicated facilities including our Language Centre, language resource rooms, a film library and specialist software. Because language learning is all about communication, students are also encouraged to practice their languages outside the classroom by getting involved in our student society, LangSoc, and by making the most of initiatives such as our Language Buddy scheme and our mentoring project with local schools.

Linguistics
Our students benefit from a state-of-the-art learning facility which include a professional grade sound / recording studio (our speech laboratory), an eye tracking laboratory, an event-related potential (ERP) laboratory and a corpus-linguistics resource facility. We also have audio and video equipment that can be checked out for field work.
Situated on the edge of the Menai Strait in 45 acres of ancient woodland and landscaped grounds, Treborth Botanic Garden is an internationally renowned botanic garden which forms an integral part of the University’s vision to provide a more sustainable world, particularly in relation to safeguarding the environment and promoting economic, social and cultural vibrancy.

The botanic garden is home to seven glasshouses, including a large landscaped tropical house, Europe’s largest underground root laboratory, orchards, arboretum and global conservation collections.

The outside gardens have free access to the public at all times, so it’s the perfect place to unwind and explore nature. You might even catch a glimpse of one of the native red squirrels, who are breeding and thriving in the garden.

There are also many volunteering, paid internship and placement opportunities at Treborth, which are great ways to learn more about plants and the natural environment.
Henfaes Research Centre is the School of Natural Science’s excellent field facility, maintaining strong links with local farmers with a section dedicated to research and education in the areas of agroforestry, crop and livestock and a forestry demonstration area.

At 252 hectares in size, it offers unrivalled opportunities to study diverse environments, from sea-level to amongst the highest land in Snowdonia, all on one farm.

The Centre for Hill and Upland Management (CHUM) is based at Henfaes, which is managed as a commercial sheep unit with 1,650 pure bred Welsh Mountain ewes, cattle, and pedigree Section A Welsh Mountain ponies. There are also alpacas and rare breed sheep, which Zoology and Animal Behaviour students can enjoy studying.
Part of Bangor University, and just a short ride from Bangor by car, bus or bicycle, M-SParc works tirelessly to help companies grow, thrive, and create exciting, well-paid careers and opportunities within the science and technology sectors. For enterprising students, they provide support and a space to grow new ventures.

Work placements
M-SParc tenant companies are always looking to inspire and nurture the talent of the future, working closely with Bangor University to offer work placements, degree apprenticeships and internships in various sectors, providing you with guidance to take advantage of the well-paid careers available in the sector.
‘Events are open to everyone to learn more about science, tech and businesses. We encourage Bangor University students to come and be part of our community.’

Emily Roberts
Operations & Customer Experience Manager, M-SParc

Photo: Richard Chivers
Skills Academy
M-SParc recently established the Skills Academy to offer students the opportunity to gain vital work experience, so that you are more prepared to apply for your dream role.

Computer Science & Electronic Engineering
M-SParc and tenant companies attend the Computer Science & Electronic Engineering ‘End of Year Expo’ giving you a great opportunity to meet players in the industry.

Events
M-SParc is renowned for running first-class events, from worldwide energy summits, Intellectual Property masterclasses to Instagram for business workshops. Students are welcome to attend the events, which provide opportunities to learn, build up your network and develop invaluable skills.

Office space
Through B-Enterprising at Bangor, M-SParc can offer you office space, fully funded by Santander Universities. This shared office space allows students to set up their own business, with all the bonuses of being at M-SParc, including business support, collaboration, and the opportunity to be part of a fantastic community.

The best panad* and cake!
M-SParc is home to Caffi Tania, so you can set up your laptop in a coffee-shop style area, and study and network amongst many of the key players in innovation in the region. (*Panad is Welsh slang for ‘cuppa!’)
LIVING AND LEISURE
Living and leisure.
Over the next 10 years we will invest more than £250m in our campus, with recent investments including the installation of new outdoor gym facilities and renovation of our popular student social space, Bar Uno.

Nestled between the mountains and the sea, our Bangor campus is surrounded by breathtaking natural landscapes, in fact, travel guide Lonely Planet named North Wales as one of the best regions in the world to visit. In the centre of Bangor you’ll find a wide-range of supermarkets, food shops, high street chains, cafes, bars and restaurants.

Most of the University buildings and halls are within walking distance of the city centre, including our award-winning student accommodation villages, Ffriddoedd and St Mary’s.

The island of Anglesey is just across the Menai Strait from Bangor and is one of the most popular destinations in North Wales, with many outstanding beaches and miles of beautiful coastline. The town of Menai Bridge, on Anglesey, is where our School of Ocean Sciences is based, and is around 15 minutes’ walk from upper Bangor.

£750k invested in the renovation of Bar Uno and a new Clubs & Societies Activity Hub.

£67k invested in the installation of new outdoor gym equipment.
Wrexham campus.

Bangor University's Wrexham campus is dedicated to a range of academic subjects. One example is our BSc (Hons) Radiography programme which is based here. For other health programmes, Bangor students (who attend lectures and practicals at our Bangor campus) also have access to the skills laboratory at Wrexham and other facilities including a dedicated library with helpful subject specific staff on site. Our Wrexham campus has excellent facilities, and our experienced academic, administrative and professional services staff who are based there come from a wide range of backgrounds.

The campus is a ten minute walk into Wrexham town centre and is an ideal choice for students wishing to experience living in a welcoming town, with several parks, galleries and museums, great shopping opportunities, plus plenty of cafes, bars and restaurants to choose from. Within thirty minutes travel you can explore the Welsh hills, discover Chester's rich medieval heritage or visit a number of historical sites including Pontcysyllte Aqueduct, Valley Crucis Abbey and Erddig Hall.

Virtual Reality Healthcare
Leading the way in ground breaking software, the Wrexham campus is using revolutionary Virtual Reality (VR) headsets and video gaming graphics to train diagnostic radiographers.

The £15,000 software system means future radiographers can learn more quickly and easily, helping to reduce a chronic shortage of skilled X-ray operators in the NHS.

£320k invested in Treborth athletics track resurfacing.

£100k invested in the development of an Interprofessional Skills Lab.
Your home at Bangor.

Living in halls is a great introduction to university life and at Bangor we guarantee a room in halls for all first-year students*.

All accommodation is self-catered and most of our rooms are en-suite. The brilliant thing about Bangor is that both our student villages are within walking distance of University buildings, giving you easy access to lecture halls and libraries.

For extra peace of mind, the halls have Senior Wardens and a large team of student mentors who can help you. There are also security staff on call 24 hours a day.

Students living in University owned accommodation at Bangor receive gym and Campus Life membership included in the price of their halls.

The Campus Life programme has been developed to help you to get the most from your time in halls, and has a varied programme of events, from yoga, film nights, pizza parties, mountain walks, kayaking to life skills workshops.

Hall fees include all bills for internet, heating, electricity, hot water, Campus Life membership, gym membership and basic contents insurance.

*For full details of our halls' guarantee go to bangor.ac.uk/ accommodation/guarantee-accommodation
Accommodation.

St Mary’s Student Village
St Mary’s is ideally located for Bangor city centre and the range of shops on the high street. This is a student village of 600 rooms comprising of en-suite rooms, studio apartments and town houses.

Ffriddoedd Student Village
The largest accommodation site is in upper Bangor, about 10 minutes’ walk from the heart of campus, the science buildings and the city centre. Bar Uno café bar is also on this site, serving meals and drinks, and the upper floor of Bar Uno also houses an activity hub for a wide range of Students’ Union clubs and societies. Also on this site is Canolfan Brailsford, the sports and recreation centre.
Snowdon Hall (Wrexham)  
There is a limited number of accommodation places for students studying at our Wrexham campus. Unfortunately, due to a limited number of rooms, we are unable to guarantee a place in accommodation at our Wrexham campus.

Applicants who have made Bangor their Firm choice will be contacted by email. Once you receive the email, you can apply online bangor.ac.uk/accommodation

Most affordable place in the UK to be a student.  
(TotallyMoney, 2019)
If you ask a student what they love about Bangor, one of the most popular answers is its close and welcoming community - when walking down the street, you will always bump into someone you know! In term time, students represent around 43% of the population in Bangor.

Being surrounded by friends is what makes Bangor such a special place to study and socialise, and our size and friendly nature means our students tend to settle-in quickly.

Much of your social life at university will revolve around the Students’ Union, which provides services, support, activities and entertainment for students.
Eat, drink and shop.

Academi is the official student nightclub and provides a focus for night-time entertainment and general socialising. With free entry for students living in University halls (through wristband entry) and special offers at the bar, it’s a great place to hang out with friends. As well as the nightclub, Academi has two bars, a café and a shop.

Bar Uno on Ffriddoedd student village, and Barlows on St Mary’s student village, are other popular venues for students, serving food, drink and Starbucks coffee. So whether you want to hang out with friends, watch big screen sports or find a corner to study – we have a space for everyone.

There are also plenty of independent bars, cafés and restaurants in and around the city.
Pontio.
Pontio showcases the very best from the world of arts and culture, including film, drama, music, dance, and contemporary circus, both local and international, in their Studio Theatre and in Theatr Bryn Terfel.

The cinema at Pontio provides the most affordable cinema tickets for students in the area, and Theatr Bryn Terfel can transform to accommodate a whole range of events, from music gigs, circus shows, plays, orchestra, comedy and much more, with student discount offered on many of the shows.

There are also performances in Pontio’s public spaces, plus art exhibition spaces, displaying works from artists who work with schools, students and the community.

Student societies also have the opportunity to perform at Pontio, with full professional support from the team.

Pontio Arts and Innovation Centre is a landmark building which links Bangor University with its surrounding community. In addition to providing a base for the Students’ Union, Pontio houses a cinema, theatres, lecture theatres, and places to eat.
Students’ Union.

The Students’ Union, Undeb Bangor, is the voice of the students and the home of student life at Bangor. It offers a whole range of support, guidance and opportunities, from sports clubs, societies, volunteering projects, UMCB (Welsh Union), Undeb Bangor Course Reps and the Student Council.

There are numerous opportunities, whether that’s finding a new hobby by joining one of the many free clubs and societies, improving your employability or making a difference in your community. Undeb Bangor will always be there to listen and support you, with a team of dedicated elected Sabbatical Officers (Sabbs) who work to ensure your voice is heard.

Undeb Bangor has once again achieved ‘Excellence’ in the Green Impact award for 2020/21. This award demonstrates how sustainability is deep rooted in Undeb Bangor’s activities and champions our student leaders.
'Bangor University's clubs and societies are amazing! Being able to do all these fun activities and socials makes time here at Bangor truly exciting!'

Akshata Galgali
Studying: Law
Free clubs and societies.

At Bangor, we have an award-winning range of clubs and societies run by the Students' Union. In fact, we have over 200 different ones that you can try and they’re all FREE to join! This means you can sign up to as many as you want, making it easier to find new hobbies and make new friends.

During Welcome Week, you’ll be able to see what’s on offer at the Welcome Week Fair. All our clubs, societies and volunteering projects will be there, so you can stop by their stalls to find out more and sign up for taster sessions, all for free.

Whether it’s a lifetime passion of yours, or a sport or activity that you have always wanted to try, there is plenty to keep you busy in your spare time at Bangor.

Sports Clubs
Whether you’re interested in traditional sports like rugby, netball or football; outdoor activities like surfing, canoeing or paddle-boarding; or something completely different like underwater hockey (Octopush) or Quidditch – there’s a club for it at Bangor!

Societies
Our Students’ Union societies bring like-minded people together. There are course-related societies, such as LangSoc, ZooSoc and PsychSoc; societies that celebrate nationalities and cultures and societies for students with specific interests like drama, music, film and photography. You can even start your own society!

Volunteering
During your free time, you can join in with volunteering projects through Student Volunteering Bangor. Volunteering is a great way to give back to the community, whilst gaining valuable skills to boost your employability.

Sports and wellbeing.

You'll be spoilt for choice with all the sports, fitness and wellbeing opportunities we have to offer at Bangor.

Our Students’ Union has over 50 sports teams and clubs which you can join for free, including traditional sports such as football, rugby and tennis as well as more unusual activities like Quidditch, underwater hockey (Octopush) and Ultimate Frisbee.
Over 50 sports teams and clubs.
We also have excellent fitness facilities on campus, and of course our location means that you can spend time outdoors in Snowdonia and beyond, climbing mountains, paddle boarding, kayaking, surfing and much more.

The University’s main Sports Centre, Canolfan Brailsford, is situated in the heart of Ffriddoedd, the main student village.

Indoor sporting facilities include:
- a state-of-the-art two storey gym
- a 9-platform Olympic and functional training area
- aerobics and cycling studios
- multi-route climbing and bouldering wall
- four squash courts
- The Dome – a tennis and netball facility
- armoury for fencing and indoor archery at the Normal site
- fitness room on St Mary’s student village
Outdoor facilities include:
- floodlit synthetic pitches for football, rugby and hockey
- natural grass pitches for American football, quidditch, lacrosse and ultimate frisbee
- FIFA Standard 3G Pitch and athletics track at Treborth
- games area with facilities for football, basketball and outdoor games at St Mary’s student village.
- a new outdoor gym area on Ffriddoedd student village and outdoor gym area on St Mary’s student village.

We work in partnership with Snowdonia Watersports, an outdoor activity base on the shores of Llyn Padarn in Llanberis, which provides a base for the University rowing programme and other water/mountain activities clubs.

Other local facilities include a 25-metre swimming pool with high diving facilities in Bangor, the National Mountain Centre (Plas-y-Brenin), and Plas Menai, the Sport Wales National Outdoor Centre.

bangor.ac.uk/student-life/sport
Experience Magical.
Bangor University makes all reasonable efforts to ensure that the information in this prospectus is correct at the time of printing – February 2022. This edition of the University’s undergraduate prospectus describes the facilities and courses which the University intends to offer during the academic year commencing autumn 2023. The prospectus and web pages are prepared in advance of the academic year to which they relate and every effort has been made to ensure that the information contained in this prospectus is helpful, fair and accurate at the time of printing. However, this information is subject to change over time. The University makes all reasonable efforts to provide the courses, tuition and learning support, research opportunities and other services and facilities with reasonable care and skill and in the way described in this prospectus.

However, the University cannot guarantee the provision of any course or facility. Some circumstances, such as staff changes, resource limitations and other factors over which the University has no control, such as industrial action or a change in the law or the level of demand for a particular programme or module (please note that this list is nonexhaustive), may result in the University having to withdraw or change aspects of the programmes, modules and/or student services and/or facilities detailed in the prospectus. This could include, but not necessarily be limited to, programme/module content, staffing, the location where the programme/module is taught or the manner of teaching delivery, and the facilities provided to deliver or support the programme. Where circumstances demand an unavoidable change or where it is necessary for the University to discontinue a programme of study, the University will take all reasonable steps to minimise the effect and all proposed changes will be notified to potential applicants who have registered an interest in the relevant programme at the earliest possible opportunity as well as being reflected on the University’s website (www.bangor.ac.uk). An individual will be entitled to withdraw from the course by telling the University in writing within a reasonable time of being informed of the change. In addition, any changes between the prospectus and the proposed course and services will be notified to applicants at the time of making an offer.

Prospective applicants are encouraged to check our website for the most up-to-date information. The willingness of the University to consider an application is no guarantee of acceptance. Students are admitted to the University on the basis that the information they provide on their application form is complete and correct. All prices quoted in this prospectus may be subject to change and you will be notified of any such change when any offer of a place is made to you by the University. Should you become a student of the University, this notice shall be a term of any contract between you and the University. Any offer of a place at the University shall be subject to the student enrolment conditions and the University’s rules and regulations as amended from time to time. A copy of the University’s current terms and conditions can be found online at: www.bangor.ac.uk/terms-and-conditions or obtained in writing from the Head of Governance and Compliance, Bangor University, Bangor, Gwynedd, LL57 2DG.
