TALK DESIGN LIVE 2022

27/5/2022

Pontio, Bangor University

VISION: Talk Design is an event for creative professionals, change makers and budding designers. Experience leading edge design philosophy, as our home grown, best friends and internationally acclaimed visionaries share their insights for future design and how to make change happen. Timed to coincide with the opening of the Bangor University Product Design Degree Show the conference kicks off a design celebration – a time to enjoy student success and collaborative ventures.

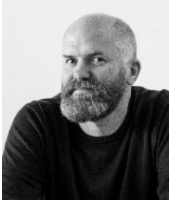

Design success relies on knowing what's happening out there in the world, our guest speakers, once again, share with us, challenge us, inspire us to aspire to make a difference – they show us how it's done, how it influences lives and how good design process implemented with care, commitment and creativity drives emotional, cultural and behavioural change.

CONFIRMED SPEAKERS IN 2022

JON MARSHALL – PENTAGRAM www.pentagram.com @jonmarshall Twitter & Instagram

Industrial Designer & Partner at Pentagram London. Jon's work fuses product design with strategy, branding, packaging and digital experiences. His CV reads as a who's who of the design world and includes working for Ross Lovegrove, Daniel Weil, Barber Osgerby, Map as well as designing the London 2021 Olympic Torch. His interest lies in working with abstract and emerging technologies, creating accessible user experiences and sustainability.

JUDE PULLEN

Winner of the 2020 Alastair Graham-Bryce "Imagineering" Award (IMechE), Jude thrives in high-risk collaborations, uncertainty and pressure - to deliver high profile campaigns and digital/physical products. His commercial work is a mixture of insights, strategy, and rapid beta testing in new markets. A leading Creative Technologist & Physical Prototyping Expert, Jude has worked for NHS, Dyson, LEGO, and a number of start-ups. He is one of the eight featured inventors in BBC Two's Big Life Fix documentary series that helps people with disabilities through technology and design.

SAM GWILT – LAYER & SAM DOES DESIGN www.layerdesign.com www.samdoes.design

Sam is an industrial designer with an eclectic mix of skills. He graduated Brunel University London and worked for Paul Cocksedge Studio, specialising in bespoke lighting installations and exhibitions internationally. He worked at design consultancy Precipice Design for three years before a recent transition to LAYER. He also runs an Instagram and YouTube channel - sam_does_design - where he shares industry tips with the design community

PROTOLABS – SAMUEL GUEST

Sam Guest is the associate product manager EMEA for injection moulding at Protolabs. With a background in engineering, sales and manufacturing, Sam is an integral member of the European Product Management Team at Protolabs. He is responsible for continually evolving the injection moulding offer so Protolabs can assist end-users by providing an optimal service. Sam's expertise reaches beyond the core services and is applied to the development and integration of wider applications.

VICTORIA RUSHTON – GERALLT EVANS METALCRAFT (Alumni) @geralltevensmetalcraft - Insta

A graduate of the product design course at Bangor, Victoria is now a company director at Gerallt Evans Metalcraft in Tan Lan, Abergele. Gerallt Evans Metalcraft are an artisan metal fabrication company, fusing traditional metal work with modern technology and manufacturing to create completely bespoke, luxury items, on a scale which would frighten most people!

www.eleanorbeer.com

ELEANOR BEER – SKETCH ARTIST

Eleanor Beer is an international graphic facilitator who specialises in delivering visual solutions and training services. Her core aim is to simplify communications through visuals storytelling, helping organisations to become more efficient and creative thinkers and collaborators. In the last 15 years, Eleanor has supported global brands across three continents, from Williams F1, Siemens and The World Health Organisation, to small grass root charities, social care initiatives and local community groups.

DANIEL ANDREWS – FLARE AUDIO (Alumni) <https://www.flareaudio.com/> pato_loco_designs - Insta

Daniel is a 2020 graduate of the product design course at Bangor Uni. Since graduating he continued to develop his design skills through freelancing and undertaking weekly online design tasks. Daniel secured his first job as a product designer at Flare Audio (following a very interesting interview process). Daniel is also a member of Tekno Remote Control Car UK where he races at local, regional and national events.

STEPHEN GRIFFITHS – AYD: HEIGHT AND MARINE SAFETY SOLUTIONS

AYD is a leader in the design of height safety, incorporating descent and rescue equipment for a world audience. AYD enjoys the challenge of developing a solution from an initial concept, through prototyping and testing into a manufactured product. AYD utilises the latest technology at each stage, and have the ability for in-house design service, 3D printing and modelling capability. They are also able to undertake in-house testing for static and dynamic performance to provide a complete solution.
