DISCOVER A WORLD OF OPPORTUNITY

DISCOVER A WORLD OF OPPORTUNITY

Oxford International run International Bangor
University International College (BUIC) in
partnership with Bangor University.

Founded in 1991, Oxford International is an accredited,
private education provider that operates vocational
Career Colleges and English language schools
across the UK and North America to create life-
changing experiences for students worldwide.

Our courses help over 70,000+ students from over
100 countries achieve academic success every year.

We have built strong relationships with education
consultants around the world and pride ourselves on
delivering the best programmes for students.

WELCOME FROM THE COLLEGE DIRECTOR

Welcome to Bangor University International College (BUIC).

BUIC is an embedded college on the Bangor University campus. Here, you can do the first stage of your integrated Bachelors or Masters course in a broad range of subjects before completing your degree at Bangor University. As a BUIC student, you will have access to all university services and facilities so will feel part of the university from the day you start.

Bangor University is a traditional university with a longstanding reputation of excellence. The University also has several modern state-of-the-art facilities. Bangor is a student city located in an area of outstanding natural beauty. It is a low cost, peaceful and safe place, that is ideal for studying.

As College Director of BUIC, I am committed to ensuring that you receive the best possible learning and teaching experience. You will study with students from all over the world. Our dedicated team of academic staff and experienced tutors will help you adjust to academic life in

the UK so that you are ready to transition seamlessly into university. Our tutors focus on developing your English language and academic study skills as well as core subject knowledge. Our classes are typically small and interactive in nature. You will receive a lot of individual support and regular feedback on your academic performance. All of this will help you to increase your confidence in communicating in a higher education context and put you on the path to both academic success and future career success.

At BUIC, we are incredibly proud of the high level of individualised support that we provide to all our students on every step of the student journey, from pre-arrival to post-departure. Our committed team of support staff are here to support you on a range of matters concerned with life as an international student. We will ensure that you feel looked after and part of the BUIC family.

You will be expected to travel to

Bangor before the start of term in October 2023 so that you can join your classes on time. Before you arrive, you will need to arrange to live in Bangor or no more than an hour from Bangor so that you can attend all your on-campus classes.

We look forward to welcoming you to BUIC soon.

Laura McKenzie

BUIC College Director

YOUR PATHWAY TO UNIVERSITY

"My favourite things about BUIC were the close knit community, approachable staff and introduction to life as a masters student!"

Nadeerah Idris from Brunei
MBA Islamic Banking and Finance

YOUR PATHWAY TO UNIVERSITY WITH BUIC

Bangor University International College (BUIC) is a specialist embedded college offering courses, where international students can begin their studies at Bangor University.

Choose your level of study

At BUIC we offer two levels of study: The International Incorporated Bachelors (IIB) and the International Incorporated Masters (IIM). Within the IIB, there are two levels, known as International Year Zero (IYZ) and the International Year One (IY1).

Continue onto your chosen degree

Following successful completion of stage one at BUIC, you will continue your studies directly with Bangor University. The University has a wide range of fantastic and highly regarded degree courses in subjects ranging from Banking and Finance to Psychology.

PATHWAY COURSES

International Incorporated Bachelors (IIB)

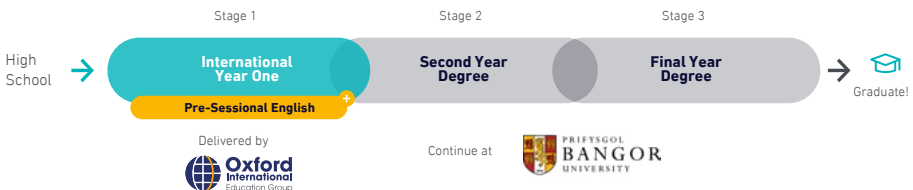

International Year Zero (IYZ)

The IYZ at BUIC is the first year of a 4-year integrated degree course. IYZ provides 1-year of preparation for entry into the first year of a 3-year bachelor's degree at Bangor University.

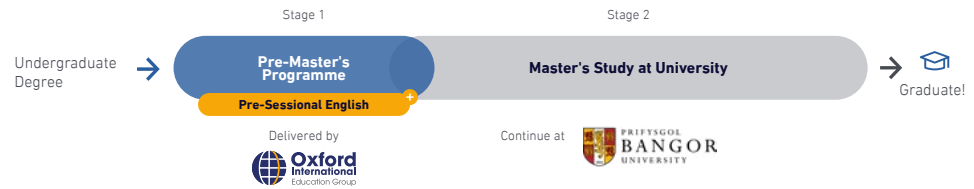

International Year One (IY1)

The IY1 at BUIC is the first year of a 3-year integrated degree course. IY1 is equivalent to the first year of a 3-year bachelor's degree, leading to direct entry into the second year of a bachelor's degree at Bangor University.

International Incorporated Masters (IIM)

The IIM at BUIC is an integrated degree course, providing either 1 term or 2 terms of preparation for entry into a 1-year master's degree in accounting, banking, business, finance or psychology at Bangor University.

SUPPORTING OUR STUDENTS TO SUCCESS

AMEERA RAHIL MIRZA
MEDIA STUDIES

"My BUIC education has provided me with the information and tools I need to be effective in the workplace. The technological abilities I'm learning as part of my program will be useful in real-world situations. Many of the skills I learnt have come in handy. I cannot overstate the importance of the soft skills that are taught during presentations and lectures. They are essential for a successful career. Best decision ever!"

SUPPORTING OUR STUDENTS

'Stay focused and dream big. Dreams do come true.'

Moneeb Ur Rehman
IY1 Business Management
and Finance

STUDENT SUCCESS STARTS AT BUIC

'I graduated from Bangor University through the pathway provided by OIEG in collaboration with Bangor University International College, which is a phenomenal institute to start your journey in higher education. I embarked on my journey in January 2020 at BUIC which was thousands of miles away from home, but the staff and the beautiful Welsh people were so welcoming that I felt at home.

BUIC prepared me for the standard of higher education in the United Kingdom which helped in the university. Learning from modules like study skills, English for academic purposes, and of course the relevant degree subjects helped me to develop a thorough fundamental knowledge of the business subject and understanding the questions and how to approach the questions. This enabled me to secure decent grades throughout my time at Bangor University. My tip for new students is stay focused and dream big. Dreams do come true.'

WHY STUDY AT BANGOR UNIVERSITY?

DISCOVER WHY BANGOR WELCOMES STUDENTS FROM ALL OVER THE WORLD

Founded in 1884 and dedicated to academic excellence for more than 135 years, Bangor University is among the oldest degree-awarding institutions in the UK. With around 11,000 students from over 110 nationalities, international students find Bangor a truly welcoming community and a special place to study.

At Bangor, you'll benefit from an exceptional academic experience set against the stunning backdrop of the north Wales landscape. Our ethos of high-quality teaching, rigorous academic standards and a post-university focus is combined with a fantastic student experience – all of which will help you unlock your potential.

Idyllic setting for student life

Situated on the north coast of Wales, with a temperate coastal climate year-round, Bangor offers an exceptional lifestyle. Located in an area of outstanding natural beauty just outside Eryri National Park (Snowdonia), Bangor boasts dramatic views across the sparkling Menai Strait to the stunning Isle of Anglesey.

A warm and friendly environment

Many of our students choose Bangor because of the friendly nature of the university and town. The university offers a relaxed environment for students to socialise, learn and make friends for life.

Social life and entertainment

Academi, the official student club, is the place to go for socialising. Bar Uno, on the Ffriddoedd student village and Barlow's, on the St Mary's student village are other popular venues for students.

The Pontio centre is a landmark building which links Bangor University and the community which surrounds it. In addition to providing a base for the Students' Union, Pontio houses a cinema, theatre, lecture theatres, and delicious places to eat.

Travel links

Bangor is relatively easy to travel to, with excellent connections to major cities and international airports in the UK. The city is just over two hours by train from Liverpool and Manchester, and three and a half hours from London*.

* All travel times given are averages based on journeys at time of writing. For current train journey times, visit nationalrail.co.uk

AN AWARD WINNING STUDENT EXPERIENCE

Bangor Student's Union (UNDEB)

WhatUni Awards 2023

CAREERS AND EMPLOYABILITY

5 STARS

Global Rating for
Employability

QS Star Rating System 2022

To prepare for today's competitive job market, students often need to think about developing professional skills and enhancing their employability while still at university. Doing so gives you a much higher chance of making a strong start in your chosen career.

At Bangor, you have the opportunity to gain more than a degree. The University's Careers and Employability Service provides a wide range of resources to help you start planning your future – as well as a number of exciting opportunities to set your career in motion.

Careers advice

The Careers Service offers a variety of resources to help you find your perfect career. Students can request a confidential personal career advice session, attend any of our workshops, and make use of online resources tailored to each subject.

Workshops and events

The university holds a range of careers events throughout the academic year. These include workshops delivered by employability advisers, job-hunting skills seminars, employer-led development sessions and careers fairs.

Internships

If you have an idea of what sector you want to work in, an internship or placement can be an excellent way to gain experience and build contacts or see what it is like to work in a particular field. Bangor

University runs undergraduate internship schemes twice a year that allow students to work in a professional environment while learning relevant skills and earning money. There is a wide range of available internships, from medical research to marketing and promotion; some courses also offer short work experience placements or projects with local companies.

Working while you study

Bangor TARGETconnect is the University's Student Employment Bureau – where students can find out about opportunities for graduate jobs (local, national and international); full-time, part-time, and temporary jobs; work experience; internships; and volunteering opportunities.

Enterprise and self-employment

The B-Enterprising programme helps students at Bangor University and graduates in Wales to develop their enterprise skills or start a new business.

Bangor Employability Award (BEA)

Open to all students, the Bangor Employability Award recognises transferable skills built through university activities. Students gain points towards the Award through volunteering, attending workshops or actively participating in the Student Union's clubs and societies. Taking part in the scheme can make a major difference to your performance in the graduate job market.

STUDENT SUPPORT

A list of Student Services available to you:

- Practical help
- Student Counselling Service
- Mental Health Advice
- Partner GP Surgery
- International Student Support
- Chaplaincy Team.

The Student Support team
bangor.ac.uk/studentservices

The welfare of our students is our top priority, and we provide a number of services to ensure students can always seek assistance for any problems.

- Our Student Services Centre provides comprehensive, professional support – ranging from financial advice and study skills to dyslexia support, welfare issues and counselling.
- A dedicated Disability Team is also on hand to give advice on a broad range of disability-related matters.

- Our International Student Support Team provides guidance on matters including employment regulations, welfare issues, living in Bangor, healthcare, immigration, and visa applications.

I Y Z

BUSINESS, MANAGEMENT AND ECONOMICS

Marketing at Bangor University ranked
in the Top 20 in the UK

(The Complete University Guide 2024)

ABOUT THE COURSE

Our IYZ in Business and Management will give you an excellent grounding in the basics of business, encompassing key economic, legal and management principles. You will also develop maths skills that are vital for your degree studies.

BANGOR BUSINESS SCHOOL

Bangor Business School is a leading teaching and research centre with a prestigious reputation. Your chosen degree course will set you on the path to a dream career in the world of business or finance. Graduates of many business-related degree courses are eligible for exemptions from modules and examinations if you wish to take a further professional qualification in marketing or accountancy such as ACCA or CIM accreditation.

WHAT WILL I STUDY?

You will study a number of modules throughout the duration of your course.

Compulsory modules include:

Business Functions

A basic introduction to the study of business and management, this module introduces the function of business in different types of organisations. It considers issues around the liberalisation of trade and the development of the global market and how they have affected businesses and the emergence of the international manager.

Business Law

Providing you with a functional knowledge of the basic rights and liabilities in law affecting modern businesses, this module covers types of business entity, such as partnerships and companies. You will learn about the legal system in England and Wales, including the small

claims track, and the rights and responsibilities of businesses in this legal framework.

Financial Accounting

Covering the basic mechanics and processes of financial accounting in theory and practice, this module prepares you for the later years of your degree studies in Business Management and Accounting and Finance. It will also give you an understanding of financial accounting procedures and their importance in monitoring progress and profitability to run a business effectively.

Macroeconomics

Familiarising you with the UK economy and government policy, this module also introduces key macroeconomic indicators, including GDP per capita, price indices and balance of payments. You'll learn about fiscal and monetary policy aims, the desire for growth and the relationship between policy and rates of inflation, deflation and unemployment. National goals are viewed in

the context of broader groupings such as the EU, and the impact of the global market.

Management Studies

In this module, you'll receive a basic introduction to the study of business and management. You'll learn the different types of businesses and organisations, as well as how to finance a start-up. The module also illustrates different approaches to management and explains decision-making processes.

Data Analysis

In this module, you will learn the maths skills expected of you at degree level. It covers essential mathematical language, notation, conventions and units, as well as developing your algebraic skills and introducing you to basic statistical concepts, topics and methods.

CONTINUATION DEGREES

BSc (Hons)

Accounting and Finance

Banking and Finance

Business Management

Marketing

Microeconomics

Providing a basic introduction to the study of Microeconomics, this module introduces relevant theories, concepts and terminology as well as explaining key topics such as demand and supply, the economic problem and the allocation of scarce resources.

IYZ

ENGINEERING AND COMPUTER SCIENCE

"Students at Electronic Engineering are involved with a number of professional bodies. Electronic Engineering is an academic partner of the UK IET and also has student chapters of two international engineering societies - IEEE and SPIE."

Dr Iestyn Pierce
Head of Electronic Engineering

ABOUT THE COURSE

Covering the major mathematical and scientific principles, this course gives you a great start in engineering and computing. With a heavy focus on maths, physics and programming, you will deepen your understanding of these subjects during your foundation year.

After finishing the course, you will continue your studies in either our School of Computer Science where you will obtain a BSc degree that is accredited by the British Computer Society or you will join our School of Electronic Engineering with its range of specialist courses. Our BEng degree courses, which are accredited by the Institution of Engineering and Technology, can set you on the road to Chartered Engineer Status.

WHAT WILL I STUDY?

You will study a number of modules throughout the duration of your course.

Compulsory modules include:

Computing 1 (Problem Solving and Programming)

Introducing you to problem solving via computer applications, you'll develop a basic understanding of algorithms and their uses, as well as gaining hands-on experience using simple software programs to solve problems. You will receive a basic introduction to the techniques of data handling and processing, and to the syntax of programming languages required for a computing degree.

Computing 2 (Database Design and Usage)

This module is a practical introduction to the technology and terminology around tabular data, and the construction and use of a database. You will develop a database for a given situation – for example, a simulated business using current standards and

appropriate software – and use that database to identify and solve problems.

Physics 1 (Properties of Matter and Waves)

In this module, you'll gain a basic knowledge of atomic physics, materials, heat and gases, and oscillations and waves. There is a heavy emphasis on safe laboratory practice and procedures. The main topics covered are: properties of waves; sound; reflection and refraction; interference and diffraction; and electromagnetic waves.

Physics 2 (Electricity and Fields)

This module provides you with a basic knowledge of electricity and electronics, and of fields, that you will be able to apply in real engineering and computing situations. You will learn about current and charge, Ohm's Law, capacitors in DC circuits, measuring AC, transistors and logic circuits.

Maths 1 (Pure)

This module provides you with the appropriate foundation in maths skills that you need for undergraduate studies in

CONTINUATION DEGREES

BSc (Hons)

Computer Information Systems

Computer Information Systems for Business

Computer Science

Electronic Engineering

BEng (Hons)

Electronic Engineering

Computer Systems Engineering

engineering and computer science. The main topics covered are: algebra, including indices and logarithms; quadratic equations; differential calculus; integration as the inverse of differentiation; and set theory.

Maths 2 (Applied)

Continuing to develop your maths skills and knowledge, this module introduces you to the relationships between forces, linear motion and energy, and the conditions for the static equilibrium of a body. The main topics it covers are: vectors; forces and equilibrium; relative motion; Newton's Laws of Motion; and friction. The module also covers the basic statistics skills for undergraduate study introducing averages, probability, normal distribution and correlation.

Maths 3 (Further)

This module covers complex mathematical skills and knowledge, such as: algebra, including partial fractions and inverse functions; sequences and series; the circle; trigonometry; differentiation and integration, including

trigonometric, and logarithmic and exponential functions; and solving first-order differential equations with separable variables, vector and vector methods in two and three dimensions.

Media Studies

Law at Bangor ranked
12th Best in the UK

(The Guardian University Guide 2024)

ABOUT THE COURSE

This broad-based pathway will give you an excellent grounding for undergraduate degrees in a variety of areas, including Media, Law, Sociology and Psychology. After completing the first stage at BUIC, you will continue your chosen degree in the School of Social Sciences, School of Law, School of Psychology or School of Creative Studies and Media.

Bangor is ranked in the top 20 in the UK for Social Policy and Administration (Guardian University Rankings 2022). Bangor Law School offers a diverse range of undergraduate degrees, our LLB degrees are approved by the Law Society and recognised for entry on to professional vocational training. Law is ranked top 30 in the UK by the Guardian University Guide 2021 and offers you the opportunity to apply for an internship in Barristers Chambers and also get invaluable experience of legal practice in our very own moot court.

WHAT WILL I STUDY?

Compulsory modules include:

Business Law

Providing you with a functional knowledge of the basic rights and liabilities in law affecting modern businesses, this module covers types of business entity, such as partnerships and companies.

Legal Systems of England and Wales - Core for progression to Law degrees

Introducing key features of the legal systems of England and Wales, this module covers its principles and processes. You will learn about the different types and levels of court, including the jury system and the roles of judges, barristers, solicitors and court officials, as well as processes around civil and criminal cases.

Macroeconomics

Familiarising you with the UK economy and

government policy, this module also introduces key macroeconomic indicators, including GDP per capita, price indices and balance of payments.

Management Studies

In this module, you'll receive a basic introduction to the study of business and management. You'll learn the different types of businesses and organisations, as well as how to finance a start-up.

Data Analysis

In this module, you will learn the maths skills expected of you at degree level. It covers essential mathematical language, notation, conventions, as well as developing your algebraic skills and introducing you to basic statistical concepts, topics and methods.

Media Studies (News Media)

You will be introduced to key concepts underpinning a range of media activities in this module. It considers the role and impact of the mass media in the UK – both print

INTERNATIONAL YEAR ONE

I Y 1

BUSINESS, MANAGEMENT AND MARKETING

Business, Management and
Marketing at Bangor ranked
23rd Best in the UK

(The Times & The Sunday Times
The Good University Guide 2024)

ABOUT THE COURSE

Our IY1 course is the first year of a business management and marketing related degree. You will learn core subjects relating to business economics, operations and information systems management, as well as marketing. On successful completion, you will continue on to the second year of your chosen undergraduate degree with Bangor Business School.

You will gain a solid grounding across all the main business disciplines, while also having the opportunity to customise your course towards your specific areas of interest with modules covering everything from the strategic and financial, to sustainability, innovation, knowledge management, leading people and managing change.

WHAT WILL I STUDY?

You will study a number of modules throughout the duration of your course.

Compulsory modules include:

Business and Banking projects

In this module you will develop and apply academic and study skills, including the skills of synthesising source material, presenting analysis and production of a final extended research essay with bibliography, and the delivery of a group-based presentation.

Introduction to Business and Marketing

This module provides an understanding of a range of activities associated with corporate, operational, functional aims, objectives, strategies and strategic decision making. Topics include tactical decision making, operational management, human resource management or managing people, organisational structures, managing change, and the relationship between

management, shareholders, and other stakeholders.

Introduction to Economics

This module introduces microeconomics and macroeconomics principles and models, providing students with a basic understanding of different economic systems, fundamental economic problems, and basic economic concepts. It focuses on the workings of the free market and investigates the government's role in improving economic efficiency. The module also helps students develop mathematical, analytical, research, teamwork, and communication skills.

Introduction to Management Accounting

This module introduces students to basic mechanics and processes of management accounting theory and practice in sourcing information, fundamental analysis, communication, and use of decision-relevant information to generate and preserve value. With these skills, students will

develop dynamic solutions and formulate business strategies.

Mathematics for Business and Finance

This module introduces mathematics and statistical techniques that are essential for further study in business, finance and economics. You will learn how to solve mathematical equations and use mathematics as a tool for decision-making in business, management and finance. You will learn how to describe data using graphical and numerical methods, and use probability to describe situations of uncertainty.

Enterprise and Entrepreneurship

This module focuses on the interrelation between management, enterprises, and entrepreneurship. It highlights the importance of effective management and the pursuit of opportunities beyond the available resources. The module aims to develop students' understanding of these concepts for success in a degree program at Bangor Business School.

INTERNATIONAL YEAR ONE

IY1

ACCOUNTING, BANKING AND FINANCE

Accounting and Finance at Bangor
ranked 5th best in the UK

(The Guardian University Guide
2024)

ABOUT THE COURSE

Our IY1 course is the first year of a business management and finance related degree. You will learn core subjects relating to management, economics and accounting. On successful completion, you will continue on to the second year of your chosen undergraduate degree with Bangor Business School.

As a student of Bangor Business School you will benefit from a varied programme of guest lectures. Recent speakers have included the Chief Executive of the Scottish Premier League, the Chief Operating Officer of No. 10 & 11 Downing Street, and the Head of IT Security at HSBC.

WHAT WILL I STUDY?

You will study a number of modules throughout the duration of your course.

Compulsory modules include:

Business and Banking Projects

In this module you will develop and apply academic and study skills, including the skills of synthesising source material, presenting analysis and production of a final extended research essay with bibliography, and the delivery of a group-based presentation.

Introduction to Business and Marketing

This module provides an understanding of a range of activities associated with corporate, operational, functional aims, objectives, strategies and strategic decision making. Topics include tactical decision making, operational management, human resource management or managing people, organisational structures, managing change, and the relationship between management, shareholders, and other stakeholders.

Introduction to Economics

In microeconomics you will examine the workings of the free-market economy, and see how economic decisions in respect of the allocation of scarce resources are shaped by market forces through the interactions between demand and supply. Production and cost theory, and the economic theory of the firm are examined, and you will debate the role of government in safeguarding the interests of consumers and producers, promoting competition, and improving efficiency.

Mathematics for Business and Finance

This module introduces mathematics and statistical techniques that are essential for further study in business, finance and economics. You will learn how to solve mathematical equations and use mathematics as a tool for decision-making in business, management and finance. You will learn how to describe data using graphical and numerical methods, and use probability to describe situations of uncertainty.

Introduction to Management Accounting

This module introduces students to basic mechanics and processes of management accounting theory and practice in sourcing information, fundamental analysis, communication, and use of decision-relevant information to generate and preserve value. With these skills, students will develop dynamic solutions and formulate business strategies.

Introduction to Economic Analysis

This module emphasizes the importance of efficient management and exploring opportunities beyond existing resources in understanding the interconnectedness between management, enterprises, and entrepreneurship. It aims to enhance students' comprehension of fundamental concepts, facilitating their success at Bangor Business School.

CONTINUATION DEGREES

BSc (Hons)

Accounting and Finance

Banking and Finance

Accounting and Management

Economics

Economics and Finance

Introduction to Financial Accounting

The module helps students familiarise themselves with accounting terminology and fundamental concepts, pick up accounting as a business language, and enhance their employability. It also introduces a basic accounting technique, record keeping, accounting rules and how the profession is governed and evolves over time.

INTERNATIONAL YEAR ONE

I Y 1

PSYCHOLOGY

Psychology at Bangor University is ranked
24th Best in the UK

(The Guardian University Guide 2023)

ABOUT THE COURSE

A psychology degree opens up a variety of career options, such as a professional Psychologist as well as other disciplines in healthcare, teaching, marketing, or management. Even if you decide to ultimately not join the world of psychology, the analytical, and research skills you gain will make you a high-quality candidate for many organisations.

Our IY1 in Psychology at BUIC offers you an alternative route to a BSc (Hons) Psychology degree. Once you have completed this first stage at BUIC, you will continue directly with Bangor University, home to one of the largest and most cosmopolitan psychology departments in the UK.

CONTINUATION DEGREES

BSc (Hons)

Psychology

WHAT WILL I STUDY?

You will study a number of modules throughout the duration of your course.

Compulsory modules include:

Applied Psychology

This module looks at ways in which psychological training, theory and research can apply to real-life situations. In addition to clinical, educational psychology and counselling, you will also look at forensic psychology, the impact of psychological insights in the world of business and management and urban planning. The module will show how an understanding of human attitudes, reactions and behaviours influences decision-making in all these areas.

Behavioural Psychology

You will consider the link between behaviour and the mind, conditioning and the interaction with the environment. What defines rational and abnormal behaviour and why behaviours are so

difficult to influence or adjust are discussed. Additionally, this course reviews mental health problems, including stress, anomalous psychology and the experience of the paranormal. You will also consider positive psychology and the science of happiness and well-being.

Biological Psychology

You will learn the principles of biological psychology, considering the anatomy of the brain and how the brain influences the mind, so affecting behaviour. You will examine the different location of mental functions and behaviours and how the brain may be affected by injury or neurological disorder. Elements of cognitive psychology are explored, including memory and language acquisition.

Research Methods for Psychology

This module aims to introduce you to the research methods and statistics used within Psychology. You will learn about using the correct

scientific method for planning, undertaking and interpreting research.

Scientific Communication

This module teaches you how to communicate within a scientific setting clearly and effectively, both in writing and verbally. You will study scientific texts and listen to lectures and write summaries of what you learnt from this. This style of learning will provide you with the opportunities to demonstrate your understanding of and ability to engage with scientific writing. Students will also be required to work in groups, discussing current Psychology topics.

Social Psychology

This module will look into psychological theories in Social Psychology. Students will get an introduction into interpersonal relationships, attitude formation, structure and change, social influence and group dynamics. This course allows students to explore human behaviour in a social and cultural context.

Introduction to Psychology

This course provides an overview of the development of psychology as a field of study, exploring its origins in philosophy and medicine. It examines various historical and psychological approaches and their relevance to current issues. The course covers a wide range of topics, including the causes of antisocial behaviour, the nature of memory, and the impact of stress on individuals. Additionally, the course delves into the biology of the brain and theories of cognitive development.

Accounting and Finance

Business and Management

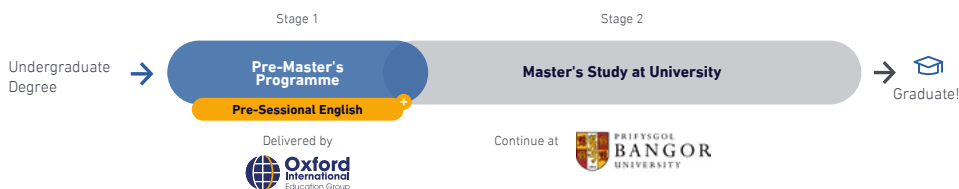

Investment and Banking

Psychology

OVERVIEW

The Pre-Masters Programme (PMP) of our International Incorporated Masters (IIM) pathway is delivered at Bangor University International College (BUIC). The PMP ranges in length and provides an essential grounding for successful postgraduate study. Once you successfully complete this programme, you will continue studying the remaining stage of your degree at Bangor University.

This stage of your Pre-Master's Programme focuses on equipping you with additional skills in your chosen study route and the advanced study and English language skills you need to complete your postgraduate study at Bangor University.

To enrol on to the PMP you must meet the following entry requirements.

ENGLISH LANGUAGE REQUIREMENTS

For direct entry to the PMP pathway the minimum overall IELTS score requirement is:

One Term

- **Psychology**
(5.5 with no skill less than 5.5)
- **Business**
(6.0 with no skill less than 5.5)

Two Terms

- **Psychology**
(5.5 with no skill less than 5.5)
- **Business**
(5.5 with no skill less than 5.5)

Chat with our students
Want to know more about the PM at BUIC? Meet one of our student ambassadors and get your answers first hand.

COUNTRY SPECIFIC REQUIREMENTS

Visit our website for more information on country specific requirements
oxfordinternational.com/admissions/country-entry-requirements

COMMON MODULES FOR ALL PMP PATHWAYS

As well as modules unique to your specific pathway, you will also study one module common to all pathways. These modules are:

- Introduction to Postgraduate Study in the UK - excludes Psychology
- English for IIM Preparation 1 and 2 (Two Term only)
- Business English (Two Term only and excludes Psychology)

For more information on these modules please visit oxfordinternational.com

IIM

ACCOUNTING AND FINANCE

"Teachers in Bangor University are professional and Bangor is a peaceful place to study and make friends."

Siyi from China
Banking and Finance

ABOUT THE COURSE

Accounting professionals are relied on to resolve complex issues in the business world, and advanced education can give you a competitive edge in your career.

The Bangor Business School is a leading European centre for research in the area of Accounting and Finance, and we've carried out consultancy work for the World Bank, the European Commission and the UK Treasury. The Pre-Master's stage of the IIM will give you the essential skills you need to continue studying one of Bangor's exceptional postgraduate degrees in accounting and finance.

These degree courses provide the option to follow the CFA (Chartered Financial Analyst) specialist pathway and acquire the skills to complete the CFA Level 1 examination. The CFA has become the most respected and recognised professional qualification in finance in the world.

After successfully completing the Pre-Master's stage at BUIC, you will continue your IIM at Bangor Business School.

CONTINUATION DEGREES

MSc

Accounting

Accounting and Finance

Accounting and Banking

WHAT WILL I STUDY?

You will study a number of modules throughout the duration of your course.

Compulsory modules include:

Auditing - 2 term only

This module considers the importance to a business of the monitoring of its financial performance, both in terms of meeting the requirements of the regulatory environment within which businesses operate and of providing information of a company's performance and its financial standing to its executives and shareholders. The external auditing process is reviewed, including evidence requiring to be produced, compliance tests and substantive tests, analytical review and computer-assisted audit techniques, completion checklist and the final auditor's report and the need for properly submitted accounts to the Registrar of Companies.

Financial Accounting

The aim of this module is to provide an introduction to accounting in terms of theory and practice and covers the main applications of ICT to financial accounting. It provides you with an understanding of the technical aspects of the subject, including double-entry bookkeeping, calculation of key ratios and the preparation and use of financial statements with a focus on limited liability companies. It considers appropriate UK practice but focuses on International Accounting Standard practice.

Finance, Investment and Banking

The main aim of this module is to provide you with an introduction to corporate finance. You will examine the concepts and principles underlying key financial decisions, risk and return, the evaluation of projected capital investment and analysis of financial performance. The module further offers

insights into the nature of the financial instruments, financial markets and financial intermediaries, with particular focus on the banking business.

Management Accounting

This module focuses on the techniques of management accounting that are used to collect, process, and present financial and quantitative data within an organisation to aid performance management, cost control, planning and pricing and, through these, the process of managerial decision-making. You will be made aware of the major accounting concepts and of how financial statements are used to support companies in their measurement of profit and valuation of assets and in their planning for future strategic moves and developments.

INTERNATIONAL INCORPORATED MASTERS

IIM

BUSINESS AND MANAGEMENT

"Bangor is a historical university, providing good education and excellent teaching systems. I've learnt lots."

Yinzhou from China
Investment Management

ABOUT THE COURSE

If you want to broaden your understanding of issues affecting the business world, the Pre-Masters at BUIC provides the ideal start to your chosen Master's degree at Bangor University.

After successfully completing the Pre-Master's stage at BUIC you will continue your IIM in Business and Management at Bangor Business School.

All these degree courses are dual accredited by the Chartered Management Institute (CMI), which means that graduates will gain two qualifications – a Bangor University Master's degree, and a CMI Level 7 award. Some of the degree modules offer professional recognition by other relevant professional bodies including CIM and IEMA.

WHAT WILL I STUDY?

You will study a number of modules throughout the duration of your course.

Compulsory modules include:

Business Environment

This module introduces you to economic theories and systems and relates these to the environment within which businesses function. You will further be equipped with the critical skills to apply the concepts and principles you study in a business context. You will be taught to consider the impact of government policies and actions on businesses and to look beyond national policies to the influence of wider economic and political groupings of states.

Business Strategy and Marketing

This module provides an understanding of key concepts, recent developments and issues within the study of strategic decision-making within business organisations with

an emphasis on a critically evaluative approach to and outcomes. You are also introduced to the theories and concepts of marketing as a business function and will relate theory to practice in terms of setting a company's marketing objectives, formulating and implementing a marketing strategy, sales and promotional activities, market research and the impact of technology on marketing activities.

Finance, Investment and Banking - 2 term only

The aim of this module is to provide you with an introduction to corporate finance. You will examine the concepts and principles underlying key financial decisions, risk and return, the evaluation of projected capital investment and analysis of financial performance. The module further offers insights into the nature of the financial instruments, financial markets and financial intermediaries, with particular focus on the banking business.

PSYCHOLOGY

ABOUT THE COURSE

Psychology is an applied science which seeks to understand the behaviour of the mind.

BUIC offers you an alternative route to a masters in Psychology at Bangor University. BUIC will provide you with subject-related academic and English language support to help you succeed as you continue your studies. A postgraduate degree in this field can lead to a range of career opportunities from clinical psychology to marketing and advertising. Sunday Times Good University 2022 rated Bangor University 81.4% on completion rate.

WHAT WILL I STUDY?

You will study a number of modules throughout the duration of your course.

Compulsory modules include:

Research Methods (Psychology)

During this module students will learn about deploying the scientific method in planning, undertaking and interpreting research within Psychology.

Scientific Communication

During this module students will learn about the scientific method and the importance. Within a scientific context, of conveying information in a clear and effective manner with due regard to the style, language, format and conventions appropriate to scientific discourse.

Personality and Individual Differences - 2 term only

This module addresses key topics within the field of personality, intelligence and individual differences. The module is split into two parts: intelligence and

personality and each will be assessed separately. The areas covered involve historic and current perspectives on personality, including psychoanalysis, humanistic and trait approaches. Individual differences and intelligence will be explored including intelligence testing, emotional intelligence and heritability of intelligence.

Concepts in Psychology - 2 term only

The emphasis of this module will be on providing students with a conceptual and historical understanding of psychology and how it has developed into the academic discipline that it is today. The focus of the course will be on theoretical understandings of psychology – how psychology as a science pursues discovery of new things through experimentation and scientific endeavour. This course will focus on how these findings are understood and interpreted using classic and contemporary theories.

HOW TO APPLY

APPLYING WITH US IS EASY. YOU
CAN APPLY USING OUR ONLINE
APPLICATION FORM

To start your application you will need the following

A copy of your valid passport

**A copy of your original qualification
certificate and transcripts**

Certified translation (if applicable)

A personal statement

This should outline why an applicant
has chosen the university, the selected
course and future career plans

**Any current and previous visas, CAS
and copies of exit stamp.**

Please also include a copy of any
previous visa refusal letters

**Evidence of English language
proficiency at the required level**

We accept a range of English
language qualifications, please visit
oxfordinternational.com for more information.

WHAT HAPPENS AFTER YOU SUBMIT YOUR APPLICATION?

STAGE 1: CHECK QUALIFICATIONS

We will carefully review your application and check if your academic qualifications and level of English language are suitable for entry to the chosen course.

STAGE 2: ISSUE CONDITIONAL OFFER

Assuming the application is successful; we will send you a formal offer of a place.

STAGE 3: ACCEPTANCE OFFER

Once you've met all the conditions outlined in your Conditional Offer we will send you an Unconditional Offer.

STAGE 4: SUBMIT DEPOSIT

To accept a place on the course, you will need to make a deposit to confirm your offer. The amount of your deposit will be confirmed in the Offer Letter.

STAGE 5: CAS ISSUED

Upon receipt of the deposit we will request your pre-CAS documents. Once the pre-CAS documents have been received, we will issue you a Certificate of Acceptance for Studies (CAS) number.

STAGE 6: APPLY FOR VISA

You will then need to apply for a visa if necessary.

STAGE 7: FINAL PAYMENT

Advance payment of the remaining fees will be required prior to arrival.

STAGE 8: ACCOMMODATION

Once you have chosen BUIC as your firm choice, you'll receive an invite to book your accommodation and we will provide you with all of the necessary details.

STAGE 9: PRE-ARRIVAL

Before the start of the course we will send you details of how to register and a welcome pack. Our Pre-Arrival, Advisors will call you after you've received your CAS letter to answer any questions that you may have. The team are an excellent source of useful tips and information, and they will help you plan ahead so you can join your classes on time. The advisors will call you on the mobile number you provided in your application form, please let us know if your number has changed since you applied!

STAGE 10: WELCOME TO THE UK!

We will also ask for details of your flight to the UK. We can then arrange for a taxi transfer upon your arrival at a UK airport (additional fees apply).
