Section B – to be completed by the Supervisor(s)
Supervisor(s) to comment on how realistic the student's plan is, on how they and/or the other members of the Supervisory team will engage with the student during this extension period, and to whom they will regularly report the student's progress during the extension period.
<i>This student has provided work of an exemplary quality thus far and has always met agreed targets</i>

until this point. It is a shame that this student has experienced difficult personal circumstances, leading to a need for a 6-month extension. However, from the basis of the work already submitted to me, and the detailed completion plan we have agreed, I am confident that this student has every chance of submitting a thesis of exceptional quality by the revised deadline. Within our School, we have monthly teaching staff meetings, at which we must report to the PGR Lead on how our students are progressing. This student will also be attending an annual review in June 2022, and will be monitored on her progress there as well. As lead supervisor, I will be continuing to support this student, as I have throughout the rest of her PhD, and will be reading all chapters, offering feedback, and helping prepare her for the viva too in due course. The second supervisor will be reading and giving feedback on Chapter 6 and 7, where his specialities lie, as we have previously agreed. Thank you for your consideration of this matter. Dr Doeslots.

As PGR Lead in the School, I am happy to confirm that this completion plan seems sound and that the Supervisory team are capable of achieving the revised deadline. Monitoring of all our PhD students is carried out on a monthly basis, so I will have oversight of any issues as and when they arise. – Professor Perfect
